TOKYO INTERNATIONAL UNIVERSITY 2022

English Track Program 2022 Prospectus
Undergraduate Degrees

Business Economics
Digital Business and Innovation
International Relations
A University that Stands Tall Within the World

- Tokyo International University’s Pledge -

The founding philosophy of Tokyo International University is “nurturing truly internationally-minded people through Kotokushin, or unbiased harmony”. The essence of Kotokushin dates back to the 16th century when Francisco de Xavier (1506~1552), among others, conveyed Japan’s philosophy of Wa, or “harmony”, far throughout the international community.

It is under this founding philosophy that Tokyo International University hopes for the prosperity of a sustainable humanity and thus strives to invite renowned faculty from around the world to conduct academic research and educate our students. Particularly, as we develop all major fields to have an international outlook, we also provide an environment where the youth of the world can flourish and devote themselves fully to their education and research on behalf of the prosperity and togetherness of humanity.

Ladies and gentlemen, I look forward to you joining our university.

Nobuyasu Kurata
Chancellor and Chair, TIU
Refine true skills for success around the world.
Earn your degree in the heart of Japan.

TIU created its English-medium undergraduate degree to provide international students interested in Japan with the opportunity to develop practical skills in three fields of importance to the global marketplace: business economics, digital business & innovation, and international relations. By 2023, we hope to grow to over 2,000 international students from over 100 countries.

### Why Choose TIU

**Reason 01. Practical courses to refine skills**
Choose your own concentration modules or study path to focus on the field that matches your interests.

**Reason 02. World-class diversity in the capital of Japan**
Immerse yourself in an international environment with direct access to all of the opportunities Tokyo offers.

**Reason 03. Active learning in small classes**
Develop a deeper expertise through direct and active communication with your professors.

**Reason 04. Challenging Japanese courses for your career**
Develop and polish your Japanese prowess through intensive and specialized courses to attain business proficiency.

**Reason 05. Study opportunities worldwide**
Explore your horizons through options in over 300 programs across 50+ countries.
06

**Business Economics**

**Overview of the Major**

The world we live in has a serious scarcity of resources. If we all could have unlimited access to goods, such as breathable air or drinkable water, the world would operate much smoother. However, since these resources are not abundant, we need to create an order of allocation to avoid conflicts or war (economics). Simultaneously, organizations and individuals prioritize certain economic activities in order to make a living by producing, buying, and selling commodities and services (business). Thus, by combining these core fundamentals, the Business Economics major was born.

Due to the vast array of fields in Business Economics, the major at TIU is separated into five concentration modules. Students will learn the diverse ways of analyzing economic activities that go beyond national boundaries, such as international trade and finance, while developing the actual skills to assess and determine order for the allocation of scarce resources. In addition, the many components of business will be thoroughly analyzed, while utilizing state-of-the-art IT to develop the skills to analyze markets and make the decisions required to build an organization with sound management. Mastery of the concepts found in the two core fields of business and economics will provide numerous opportunities in companies, ventures, banks, and consulting firms, among other global organizations, as well as a clear path towards an MBA or other advanced degrees.

I enjoy teaching in the E-Track Program because discussions are always interesting and I get to learn new perspectives from our diverse student body. I feel a major advantage of our program is this global perspective that students encounter throughout their time here. In my classes, I try to have discussions where students can share how their lived experiences align with or differ from theories taught in class. We also look at cases and analyze them together (for example, by using SWOT analysis) to deepen understanding of the concepts found in the two core fields of business and economics will provide numerous opportunities in companies, ventures, banks, and consulting firms, among other global organizations, as well as a clear path towards an MBA or other advanced degrees.

**Message from TIU Institute for International Strategy**

I studied Engineering at Kyoto University, Japan, and joined MIT to explore Management and Operations Research. MIT is a global institution where top-notch students and faculty gather from all over the world, and co-produce cutting-edge educational and research outcomes. At first, I was startled to know that the curriculum was very challenging. But, it was well-thought-out and instructors delivered it wonderfully well. Lasting friendships with my colleagues students were developed through working hard together. So, I could master everything I learned, of course, with some good efforts. I developed the solid confidence as a professional person, which lasts in my entire career. TIU recreates and provides a truly global learning environment like MIT, with a social science professional focus. Come to join us, our globally top-notch students and faculty, and let us co-produce the dynamic results that contribute to your professional career and the society in future.

**Hirofumi Matsuo**
Director of the TIU Institute for International Strategy and Professor of Operations Management
B.B. / M.B. Kyoto University | Ph.D. Massachusetts Institute of Technology

**Business Economics Faculty**

**Keyhan Tajeddini**
Professor of International Business
B.A. Tel Aviv University | M.A. Macquarie University | Ph.D. Bradford University

**Vasily Lubashevsky**
Assistant Professor of Applied Mathematics
B.E. / M.E. Moscow Technological University (MIITEA)
Ph.D. The University of Tokyo, School of Engineering

**Kuniko Ishiguro**
Associate Professor of Management
B.A. Gakushuin University | M.Sc. / Ph.D. University of Sheffield

**Christopher Edmonds**
Associate Professor of Development and International Economics
B.S., Cornell University | M.A. University of Chicago
M.S. / Ph.D. University of California-Berkeley

**Samuel Ampounsa**
Associate Professor of Economics
B.A. University of Cape Coast | M.A. / Ph.D. Tokyo International University

**Jau-er Chen**
Associate Professor of Economics
B.A. / M.A. National Chung Cheng University, Taiwan | Ph.D. New York University

**Rangga Handika**
Lecturer of Finance
B.S. Universitas Indonesia, Indonesia | M.Com. / Ph.D. Macquarie University, Australia
Dr. rer.pol. Georg-August-Universität Göttingen, Germany

**Yasuhiro Toride**
Professor of Business Administration
B.A. / M.S. The University of Tokyo

**David Meltie**
Professor of Business Economics
Ph.D. University of California

**Rajarshi Mitra**
Associate Professor of Economics
B.A. / M.A. Visva-Bharati University | Ph.D. University of Wisconsin-Milwaukee

**Associate Professor of Economics**
B.E. / M.E. Moscow Technological University (MIREA)

**Dr.rer.pol Georg-August-Universität Göttingen, Germany**

**Vanda from Thailand**

My four years studying Business Economics at Tokyo International University (TIU) have been truly exceptional and a memory to cherish for a lifetime. The Business Economics major is a platform of practical learning which has prepared me for a career both in Japan and abroad. The classes here have taught me many valuable skills such as how to adapt to technological developments in the business world. It has shaped me into a more versatile person who is ready for new challenges. It also opened doors to new opportunities like exploring Japanese culture and studying abroad. Throughout the years, I have met many amazing teachers, friends and faculty members who loved to share their knowledge and gave support whenever I needed it.
BE Concentration Modules

The Business Economics major is separated into 5 different focus areas called concentration modules. It offers a wide range of courses including recently added digital business courses.

**Entrepreneurial Business**
- Digital Business Strategies
- Institutions and Business Transformation
- Entrepreneurial Strategies
- Mathematics for Business and Economics
- Principles of Management

**Economics**
- Behavioral Economics
- Development Economics
- Game Theory
- Macroeconomics
- Mathematics for Business and Economics

**Management**
- Business Planning
- Corporate Finance
- Entrepreneurial Strategies
- Financial Accounting
- Human Resources Management
- International Business

**Marketing**
- Consumer Behavior
- Digital Marketing
- Financial Accounting
- Global Marketing
- Human Resources Management

**Finance**
- Corporate Finance
- Finance
- Financial Accounting
- International Finance
- Investments

**Graduate School of Economics (Master of Arts Degree)**

Teaching business economics in our interdependent and globalized world benefits from a mix of academic and practical knowledge, which I acquired more than a decade of experience applying economics in business settings in a number of countries. Learning in a traditional lecture-based environment can be challenging for many students, so, I adopt a few approaches to try to actively engage students in lectures. I incorporate practical exercises (usually Excel-based) that require students to apply theories learned in quantitative analyses. I believe encouraging discussion in-class is vital; monologues lectures rarely facilitate engaged learning and the development of critical analytical skills. Bringing passion and energy to the topics being taught, and linking theories to practical issues confronted in daily life, helps motivate students, makes a great fit as I have been teaching, entrepreneurship, or business management. What this means is that students will obtain knowledge on how to innovate products, services, and business models by using new technology. Students will learn how to identify and conceptualize key technologies and platforms as well as how to adapt these to foster business innovation.

### Digital Business & Innovation

Technology is leading the future and changing businesses everywhere. The Digital Business & Innovation (DBI) major was created to help today’s students adapt to the current workforce by building a bridge between business and technology. What this means is that students will obtain knowledge on how to innovate products, services, and business models by using new technology. Students will learn how to identify and conceptualize key technologies and platforms as well as how to adapt these to foster business innovation.

DBI is separated into six concentration modules focusing on different areas of digital business. Be it fintech, AI, programming, entrepreneurship, or business management, this major offers focus areas for anyone interested in a career in business innovation.

### Overview of the Major

Teaching and research are two faces of my academic life which closely support each other. For my research, I love to be inspired by the courses I am teaching, and I love to teach something related to what I am researching. My research field is nano-quantum technologies, and teaching computer networks, for example, makes a great fit as I have been conducting research for developing future quantum networks.

On the other hand, teaching blockchain technologies and artificial intelligence has made me concentrate my research on quantum blockchains and quantum artificial intelligence. As a result, my students learn the history, current state, and future of the topics we cover, which I believe will prepare them for their future careers. Moreover, my extensive experience in information technologies covers everything from international trade to defense electronics, which brings our lectures closer to innovative business applications in real life.

### Graduate School of Economics (Master of Arts Degree)

Christopher Edmonds

Associate Professor of Development and International Economics

B.S. Cornell University | M.A. University of Chicago | M.S. & Ph.D. University of California-Berkeley

Fatih Ozaydin

Associate Professor of Computer Science

B.S. & M.S. Bilkent University | Ph.D. Osaka University
**Message from TIU Vice President**

The concept of entrepreneurship struck me during my first job at Bell Laboratories in the US, which I started shortly after graduating with my Ph.D. Bell Labs, owned by AT&T, was a premier research institution that was home to many prolific researchers, including several Nobel Prize winners. Although many of my friends left the lab to start their own businesses, I chose to become an academic. However, I also took some time off from my teaching to learn fashion design in Italy, and started my own online jewelry business. My business grew gradually with the rise of the internet, but in the end I decided to sell it to focus on my academic calling. I found that IT is a realm that offers boundless potential to tap into. With this concept at the heart of DBI, I guide my students to uncover their true potential, and it is a joy to see young people get motivated to create start-ups like I did! I found that the location of TIU and the resources we offer form an ideal breeding ground to be entrepreneurial.

**Digital Business & Innovation Faculty**

- **Nora Sharkasi**
  Associate Professor of Digital Marketing, Data Analytics and Entrepreneurship
  B.S. Lalochhe College, Pittsburgh, USA
  M.S. London School of Economics and Political Science
  M.B.A., Birziet University, Middle East | Ph.D. University of Toledo, School of Engineering

- **Vasily Lubashevsky**
  Assistant Professor of Applied Mathematics
  B.E. | M.E. Moscow Technological University (MIREA)
  Ph.D. The University of Tokyo, School of Engineering

- **Rajarshi Mitra**
  Associate Professor of Economics
  B.A. | M.A. Viva-Bharati University | Ph.D. University of Wisconsin-Milwaukee

- **Yee Heng Tan**
  Lecturer of Economics
  B.A. | Ph.D. Singapore Management University

- **Jau-er Chen**
  Associate Professor of Economics
  B.A. / M.A. National Chung Cheng University, Taiwan | Ph.D. New York University

- **Parag Kulkarni**
  Professor of Machine Learning, AI and Innovation Strategy
  B.E. Walchand College of Engineering | M.E. IGDTU | Ph.D. IT | D.Sc. UGSM-Monarch

**Digital Business & Innovation Core Courses**

- **Entrepreneurship & Business Innovation**
  Principles of Management
  Digital Business Strategies
  Digital Business Strategies: Creative Thinking for AI & IoT Innovations
  Introduction to Computer Networking: Mobile Tech, IoT & Business Apps
  Intro to AI & Intelligent Product Development: Start-up Funding & VC Strategies

- **AI & Deep Learning**
  Database & Big Data
  Mining Unstructured Data
  AI and Machine Learning for Decision Making
  Econometrics
  Text Mining and Deep Learning
  Research Methods & Data Analysis in Business
  Creative Thinking for AI & IoT Innovations
  Data Analytics & Information Management

- **Digital Transformation & Tech Innovation**
  Introduction to Informatics & Computing
  Web and Mobile Technology
  Digital Business Strategies
  Database & Big Data
  Digital Marketing
  Python for Big Data & Visualization
  Digital Marketing

- **Digital Business Management**
  Business Communications & Productivity
  Financial Accounting
  IT Project Management
  Human Resource Management
  Operations & Service management

**DBI Concentration Modules**

Our new major is divided into six concentration modules for students to find exactly what piques their interest in the realm of technology and business. Become an expert in the latest digital trends and develop the skills needed for true innovation in the business world.

**Entrepreneurship & Business Innovation**

- Principles of Management
- Digital Business Strategies
- Digital Business Strategies: Creative Thinking for AI & IoT Innovations
- Introduction to Computer Networking: Mobile Tech, IoT & Business Apps
- Intro to AI & Intelligent Product Development: Start-up Funding & VC Strategies

**AI & Deep Learning**

- Database & Big Data
- Mining Unstructured Data
- AI and Machine Learning for Decision Making
- Econometrics
- Text Mining and Deep Learning
- Research Methods & Data Analysis in Business
- Creative Thinking for AI & IoT Innovations
- Data Analytics & Information Management

- Marketing Research
- Consumer Behavior
- Database & Big Data
- Digital Marketing
- Python for Big Data & Visualization
- Global Marketing

**Digital Finance & Fintech**

- Machine Learning in Finance and Economics
- Financial Accounting
- Corporate Finance
- Financial Accounting
- E-business and Payment Systems

**Digital Business Management**

- Business Communications & Productivity
- Financial Accounting
- IT Project Management
- Human Resource Management
- Operations & Service management

**Graduate School of Digital Marketing & Business (Master of Science Degree)**

In the modern age, the demand for professionals in digital marketing far exceeds supply, leaving businesses franticly searching for globally oriented individuals with both business and IT skills. I have always been on a quest for knowledge and am interested in learning novel things. My passion for digital marketing started during my undergraduate studies when my focus was on building e-commerce websites and coding. However, at that time there were no specialized majors in IT business, so I combined multiple degrees in related fields as well as pursued research on virtual and augmented reality to fill the gap. Later, I chose to study marketing analytics in Japan, the best destination for this purpose. TIU offers a globally competitive program covering topics ranging from social media and search engine optimization, online advertising, big data and analytics, to virtual and augmented reality, as well as courses covering breakthroughs in blockchain technologies and the internet-of-things. Students will also benefit from practical courses in state-of-the-art computer labs. This is your perfect opportunity to learn the skills that will lead you to further success!

**Nora Sharkasi**

Associate Professor of Digital Marketing, Data Analytics, and Entrepreneurship
B.S. Lalochhe College, Pittsburgh, USA | M.S. London School of Economics and Political Science (LSE), UK
M.B.A. Birziet University, Middle East | Ph.D. University of Tacoma, Japan

**Shreya from India**

We are currently living in a world dominated by the internet. It’s not a hidden truth that e-businesses, social media, e-learning, and hundreds of other services not only have an intensive technical, but also economic network. DBI smoothly integrates these two promising fields; business and technology. My DBI courses at TIU gave me a comprehensive understanding of upcoming technologies like artificial intelligence and machine learning. Moreover, the flexibility of TIU’s curriculum allows me to coordinate my study plan by integrating both technical and business courses. These not only help me to learn about engineering principles, but also understand their front end applications in the contemporary business world. I was able to apply the knowledge I gained in the hands-on projects that I worked on with my group during the career-practicum program organized by Tech Mahindra in partnership with TIU. For the same reasons, I was also able to secure an internship at an artifical intelligence startup based in Silicon Valley as a content writer. In my opinion, DBI is the future. In the later courses of my study, I aim to deepen my understanding of artificial intelligence while simultaneously working on business projects in this field.
Partnership with Leading Global IT Giant

Digital transformation, or DX, is exactly what has happened at TIU! We created a unique path for our students to tap into the opportunities created by the rapidly advancing digital century. Following the establishment of the DBI program, TIU attracted the attention of two global technology companies. One, Tech Mahindra, is one of India’s leading IT companies with more than 125,000 employees across 90 countries; the other, Gyrfalcon Technology Inc. (GTI) is a world-leading developer of high-performance Artificial Intelligence processors based in Silicon Valley. TIU students in the DBI program are privileged to cooperate with leading companies that connect them to the forefront of DX, supported by experienced faculty from their research, while gaining the practical skills necessary for the digital century.

Message from Chief Innovation Officer at Tech Mahindra

Makers Lab collaborated by giving TIU students the opportunity to learn global business collaboration through a full practical course delivered by world-class IT experts from our research campus in Pune, India jointly with faculty from TIU’s Digital Business and Innovation (DBI) program. The program allowed TIU’s J-Track students to study with E-Track students to explore how to use AI, IoT, and Block Chain in business. I am very pleased to hear that TIU attracted the attention of two global technology companies, one, Tech Mahindra, is one of India’s leading IT companies with more than 125,000 employees across 90 countries; the other, Gyrfalcon Technology Inc. (GTI) is a world-leading developer of high-performance Artificial Intelligence processors based in Silicon Valley. TIU students in the DBI program are privileged to cooperate with leading companies that connect them to the forefront of DX, supported by experienced faculty and their research, while gaining the practical skills necessary for the digital century.

Mr. Nikhil Malhotra
Chief Innovation Officer | WEF AI Fellow | Tech Mahindra

Career Experience Practicum: TIU-TECHM Project

Students can even experience how cutting-edge business applications are developed by IT experts by taking a course co-developed by the DBI faculty with IT experts from the Makers Lab. Tech Mahindra’s IT Innovation Lab located in India. This career practicum provides invaluable hands-on experience for students.

Testimonials

"The practicum course conducted by TechM experts, joining online from the TechM campus in India and guided by DBI faculty, Professor Ozaydin and Professor Lubashevsky, was exciting and gave us real experience developing applications using AI, Blockchain, and IoT" - Moana Mikawa, 2nd-year student

"I am happy that students from both E-Track and J-Track could gain real experience in studying how cooperation with global IT companies can be used for DX applications in a competitive country such as Japan" - Fatih Ozaydin, Professor of DBI

International Relations

Overview of the Major

International Relations is a field of study dealing with how nations with varying power, interests, and identity interact with each other in the absence of a global government. The discipline originated in the tragic experience of World War I, when unprecedented devastation called for a systematic inquiry into the causes of war and conditions for peace. Since then, the range of issues covered in the discipline has expanded to include economic interdependence, international organizations, terrorism, poverty, human rights, and climate change, among others.

International Relations as a discipline is not just about what is happening around the world. We study why countries and national leaders behave the way they do, using different intellectual lenses called theories. When discussing global issues such as nuclear proliferation, terrorism, refugees, hunger, and global warming, there is no such thing as a "correct answer" that satisfies everyone. The important thing is that you respect different viewpoints and work to find common ground. Classroom discussions provide valuable opportunities for students with diverse cultural backgrounds to present their views and learn from each other. The skills learned are extremely useful not only in the way students approach their daily lives, but also in their future workplace, be it a multinational firm, government, or international organization. The International Relations major is for students who want to contribute to international societies as global citizens.

Christopher Lamont
Associate Professor of International Relations
B.A., University of Mississippi | M.Sc., University of Edinburgh | Ph.D., University of Glasgow

My interest in international relations led me to study abroad in Croatia at a time when the country was confronted with the task of dealing with the immediate legacy of armed conflict. It was in part this experience that led me to ask questions about how societies deal with the legacies of conflict, and to eventually write a doctoral dissertation on efforts to prosecute war crimes in the former Yugoslavia. Today, I continue to research and write on topics related to post-conflict justice and state building, and I contribute to both scholarly journals and more widely read journals such as Foreign Affairs and Foreign Policy. In the classroom, my students are encouraged to discuss contentious issues that are at the forefront of international politics so as to better understand academic and policy debates, and also to think about how they can apply their own ideas and experiences to addressing real world problems.
Message from the Dean of E-Track Program

I became fascinated in the issue of war and peace when I was seventeen and lived in the United States for a year as a high school exchange student. The experience left me with a lot of fun and precious memories but also with a long-lasting puzzle: why did Japan fight a war with the United States during World War II? My personal relationship with my host family, classmates, teachers, and other members of the community was such that it was almost unimaginable for me that the two countries fought. My relationship with my host family, classmates, teachers, and other members of the community was such that it was almost unimaginable for me that the two countries fought. Why did Japan fight a war with the United States during World War II? My personal relationship with my host family, classmates, teachers, and other members of the community was such that it was almost unimaginable for me that the two countries fought. I have a lot of positive feelings about the TIU MUN. The varsity team originated in 2017, and since then the team has already attended numerous conferences and made a great impression on the other schools in attendance. At the All Japan MUN in December 2017, our varsity team members took home half of the total awards, and I was humbled to be named the Best Delegate of the UNHRC Committee. In addition, in July 2018 TIU hosted its first international MUN conference, with delegates who traveled from countries around the world in attendance. However, I truly do believe that we can go even further than this. We are aiming to attend more conferences outside of Japan, especially the most prestigious ones in the US and the UK. I am looking forward to continuing my involvement in the MUN even after graduation, and know there are great things in store for the TIU team.

Wichuta Teeratanabodee
International Relations Major and President of the TIU MUN (2018)
General Education

TIU's general education courses aim to broaden your general knowledge while developing a strong academic foundation. By pursuing a wide range of interdisciplinary courses, you will deepen your understanding of fundamental social issues and grow into a truly international-minded person.

Liberal Arts

The liberal arts courses are a way for students to take fundamental courses relevant to their major during their first year. While some are required depending on a student’s major, a wide range is offered for students to develop a broad comprehension on a variety of subjects.

- Fundamentals of Mathematics
- Principles of Management
- Introduction to Psychology
- Introduction to Social Psychology
- Statistics I
- IT Literacy
- Sustainable Society
- Introduction to International Relations
- Principles of Economics
- Principles of Political Science
- World Economy
- Topics in Liberal Arts
- Business and Social Impact
- Food Value Chain and Sustainability
- Innovation and R&D Strategy
- Topics in Liberal Arts

Japanese Language

Students in their first semester at TIU learn Japanese in a small class setting four days a week. Instructors help students with no prior Japanese experience develop fluent Japanese skills by the time they graduate and work to push students who have already studied Japanese to even higher levels of proficiency.

- Elementary Japanese 1A
- Elementary Japanese 1B
- Elementary Japanese 2A
- Elementary Japanese 2B
- Intermediate Japanese 1
- Intermediate Japanese 2
- Advanced Japanese 1
- Advanced Japanese 2
- Upper-Advanced Japanese
- Business Japanese

The Japanese Language Institute supports international students in every aspect regarding Japanese language acquisition. There are two major missions of Japanese language education at the JLI: to build communicative ability for students’ daily lives and to prepare them with the business level proficiency required for entering the Japanese workforce. With these goals in mind, the JLI has established a series of tiers to TIU’s Japanese language education to ensure that each student is enrolled in the level that is most suited to their individual needs. Currently, there are 20 instructors within the JLI that allow TIU to maintain a small classroom size, as well as catered one-on-one advising after class when students have free time. It brings us great joy to work together with international students to keep them motivated to study Japanese and eventually make it a common language for life.

Kenji Yokota
B.A. Sophia University  |  M.A University of Tokyo  |  Ph.D. Osaka Prefecture University

Four-Year Academic Flow

<table>

</tr>
</tbody>
</table>

The first year will focus on academic writing, analytical thinking as well as Japanese language courses for students to not only adapt to life in Japan, but to prepare them for more intense high-level courses offered from their second year and onward. In combination with liberal arts courses, students will be able to apply the skills they have gained the first year towards their major studies.

Andreas from Sweden

I have always held an interest in international relations and Japan’s very unique culture. Upon discovering TIU and its international relations major, I felt it was the perfect fit for me. One of the major challenges I saw in front of me was the Japanese language, since I had no prior knowledge. However, TIU made this challenge significantly more surmountable. TIU offers its international students a great amount of exposure to the Japanese language, such as at the Japanese Plaza and clubs where you can engage with the Japanese students. The Japanese classes are intensive and the professors ensure every student is able to follow the lessons, which leads to fast and steady learning. After just a couple of months, I can now understand and engage in basic conversation, and I look forward to learning more here at TIU.
Opportunities at Willamette U.

TIU’s sister school relationship with Willamette University provides students with a number of opportunities to enhance the scope of their university takeaways.

1. **Double Degree Program**
   - High achievers have the opportunity to spend 2.5 years at TIU in Japan, then move on to their final 2 years at WU in the United States to earn two bachelor’s degrees at the same time in a total of 4.5 years!

2. **Atkinson MBA**
   - Willamette University’s Atkinson Graduate School of Management is offering TIU graduates the same enrollment and scholarship benefits as their own alumni. This is a great opportunity to plunge into business management after your time at TIU.

Study Abroad Programs

TIU is one of the only universities in Japan affiliated with ISEP (the International Student Exchange Program), a global organization promoting international exchange for one or two semesters. This program opens up opportunities to study at over 300 of its affiliated universities in over 50+ countries around the world. More and more TIU students are taking advantage of this affordable opportunity, with popular study destinations being North America, Europe, and Australia. In addition, TIU has special exchange agreements with 28 universities in 21 countries, including double degree opportunities at both Willamette University and Southern Oregon University, USA.

Study Abroad Stories

**Hanh from Vietnam**

Hello, my name is Hanh and while studying Business Economics at TIU, I decided to devote my junior year to studying abroad at the University of Chester in England through the ISEP program. The desire to travel and see the world runs in my family. My parents also studied abroad, and they inspired me to follow in their footsteps. Everything is a completely new experience and my school has huge campuses scattered around the city. We have fewer class hours but a greater emphasis on independent learning. The food is nice and the portions are enormous, but I still crave Vietnamese and Japanese food. I love my exchange program here!

**Mavy from Russia**

I love traveling around the world and experiencing new things, so last summer I decided to apply for ISEP and do an exchange program at La Trobe University in Melbourne, Australia. I’ve only been here two months yet I am already in love with this place. I experienced so many new things here that I’m excited to bring back to TIU when I finish the semester abroad. In the two months since I have moved here, I am meeting new people, making friends, getting used to a new culture, challenging myself, learning new methods of teaching, and so much more!
Career Support

International students have unlimited access to the Career Center, where they can receive one-on-one advising with career specialists. This great resource prepares students for the job hunt with a focus on career development through a variety of events and guidance sessions created to help start students' careers after graduation.

The Career Center also provides guidance for internships, interview tips and practice, insight into career paths, as well as seminars on important topics to help students succeed in the next chapter in their life. In addition, the Career Center also invites outside companies for exclusive on-campus information sessions. These sessions provide students with the opportunity to speak with real employees and learn about the status quo of the workforce.

Upon entering the highest bracket of Japan’s university soccer league (Division 1) in 2018, TIU’s varsity team has seen great success across the board. The sprawling Sakado Campus is home to the majority of TIU’s varsity teams. It boasts world-class grounds that are meticulously maintained according to pro-level regulations and supports the highest level of intramural competition. All varsity teams welcome international students with open arms, and provide an invaluable way to assimilate into a new country. The sports facilities on this campus are not widely available at universities in Japan, and provide a great opportunity to make friends in new surroundings as well as maintain a healthy study balance in your daily life.

### Varsity Soccer Team

Upon entering the highest bracket of Japan’s university soccer league (Division 1) in 2018, TIU’s varsity team has seen great success across the board. The sprawling Sakado Campus is home to the majority of TIU’s varsity teams. It boasts world-class grounds that are meticulously maintained according to pro-level regulations and supports the highest level of intramural competition. All varsity teams welcome international students with open arms, and provide an invaluable way to assimilate into a new country. The sports facilities on this campus are not widely available at universities in Japan, and provide a great opportunity to make friends in new surroundings as well as maintain a healthy study balance in your daily life.

### Varsity Archery Team

The archery grounds at TIU are nestled in a quiet, outdoor field of carefully maintained grass that is perfect for training and official competitions. While archery as a sport requires great discipline and persistence as an individual, international students have found their place in this club thanks to the welcoming team dynamic. Tarkan Koc, a transfer student from Germany, was introduced to this club by a classmate and “hooked” due to the sense of accomplishment after improving his shooting distance. Students who do not have their own bow may borrow one from the university, so anyone can join. Tarkan’s favorite takeaway is “seeing other students constantly improving.”

### Varsity TEDxTIU Team

TEDxTIU is a student organization with the goal of providing a platform to the TIU community for the exchange of ideas through self-organized workshops and licensed TEDx events. This varsity club facilitates the development of new and existing skills, vital in post-undergraduate life such as leadership, communication, and event-organization. Beyond this, members are able to meet other talented students and form great bonds, breaking cultural and language barriers.

The Japanese Plaza has a relaxed environment that is perfect for international students to meet Japanese classmates and teachers for a chance to utilize the skills learned in the classroom.

TIU has three campuses in Japan that are fully equipped with state-of-the-art facilities to support students both mentally and physically.

**Campus Facilities**

**Japanese Plaza**

Several offices are located on campus specifically to help international students throughout their studies at TIU. Whether it be support with visa applications, housing, scholarships, part-time jobs, internships, job fairs or how to build a strong resume, students can always find a helping hand.

**English Plaza**

Designed as a multipurpose language center, the English Plaza has a casual atmosphere for study. MacBook laptops students can check-out and use all day, and a cafe lounge ideal for a study break.

**Sakado Campus**

The Sakado campus contains all of our major sports clubs. With state-of-the-art facilities and assistance from professional coaches, students are able to flourish as part of a larger unit, which can be a great asset in academia as well.

**Support Offices**

Home to E-Track students with facilities that support a rich campus life, including classrooms, professors’ offices, a library, laboratories, student support offices, plazas, an auditorium, two cafeterias (including one that offers halal and vegetarian food), and a convenience store.

**Campus 1**

Campus Facilities

Sabrina from Indonesia

When I first moved to Japan, it was my first time living on my own. Thus, one of the most important elements that helped me settle in to my new environment was making friends. I live together at the R5 dormitory with people of many different nationalities, which has helped me diversify as a person. However, one of the biggest challenges I had when I first landed here was the language barrier. Even though majors are taught in English, I have been taking Japanese language classes at TIU to help me overcome this. This has improved my confidence in speaking dramatically.

For me, the key to surviving school is to be friendly with everyone and eager to learn, because people will happily be friends with you.

Library
The library at TIU is equipped with thousands of books and academic journals in English for students to utilize. Through the computers available, students are also able to access endless material via online services. Study spaces are located throughout the library for students who want to read in a quiet environment.

Cafeteria
In addition to several food trucks and an on-campus convenience store, our main campus has two cafeterias with various menu options that change weekly. As of spring 2019, one of our cafeterias was renovated, and an all-Halal and vegetarian menu was introduced.

Laboratory
Opened in the spring of 2019, the new Digital Discovery Lab (DDL) functions as one of several labs that enables DBI students to maximize their potential.

Gymnasium
While Sakado Campus is the center for sports at TIU, campuses 1 & 2 are also equipped with gymnasiums and fitness gyms for our students to use, whether for clubs or personal use.

Dorms
TIU provides both single and shared dormitories to allow students to choose the option most suitable for their individual lifestyles. Our newest addition to our dormitories is the all-girls dormitory, R5. All E-Track students at TIU are welcome to live at our dormitories for up to one year.
All students who apply for TIU’s English Track programs are also eligible to apply for a tuition reduction scholarship. The amount awarded will reduce the overall tuition payments by 30% to 100% for up to four years. The amount of scholarship, if awarded, will be announced simultaneously with admission results so students and families can formulate a funding plan prior to enrollment.

Other Scholarships

- **TIU MUN Special Scholarship**
  This special scholarship is for first year students who have previous experience in MUN, and wants to channel their knowledge and skills into MUN activities at our award-winning MUN team at TIU. Recipients of the TIU MUN Scholarship will see their enrollment fee of 250,000 JPY waived. For screening criteria, please refer to our website.

- **Japan Student Services Organization (JASSO) Scholarship**
  In order to support international students and help them assimilate to their new home, the Japanese government provides students with an opportunity to apply for a special JASSO scholarship that grants a living stipend of 48,000 yen for 6 months (September enrollment) or 12 months (April enrollment). Due to TIU’s great initiative to bolster the international population, virtually all students who apply for this scholarship are successful.

---

**Who Are We**

Studying at TIU was one of my most life-changing experiences. I really enjoyed the IR major, which allowed me to specialize in Japanese and Asian Pacific politics. During my time at the University of Sheffield, I continued to stay heavily involved in university affairs by taking the responsibility of several representative positions within the university.

Nama Nyachhyon  
Campus Representative

I am Nama from Nepal, currently a sophomore majoring in Business Economics. I love traveling and meeting new people. Along with being a campus representative, I am also a part of TedxTIU team. My motto in life is “If not now, Then when?”

* A 40,000 yen ($365) alumni association fee will also be charged prior to enrollment.

* 2nd and 3rd year transfer students’ tuition fees are on the basis of the rate stated under Years 2-4 (2023) in the above graph.

* The numbers in parentheses indicate the approximate amount in USD at the estimated exchange rate of $1 = 110 yen.
Affordability

Cost of Living

Dormitories
In order to foster a safe and comfortable learning environment, TIU operates dormitories in and around campus for students coming to Japan for the first time. We have 250+ dorm rooms available for international students, offering both single and shared rooms. Dormitory managers and Residential Assistants are available on-site to lend a hand to international students during the assimilation to their new life in Japan.

<table>
<thead>
<tr>

</tbody>
</table>

* The numbers in parentheses indicate the approximate amount in USD at the estimated exchange rate of $1 = 110 yen.
* Prices may slightly differ depending on location.

Renting Apartments in Japan
It is easy to find affordable apartments in the areas surrounding TIU’s campuses. The actual monthly rent of apartments differs dramatically based on size and location, though it is realistic to expect to pay between 30,000 and 50,000 yen ($273 – $455) per month. Students have the option to live alone in a studio apartment, or live together with a friend or classmate in a shared apartment. While most apartments are not furnished, some real estate agencies do have furnished options available at a higher monthly price. Unfurnished apartments may have an air conditioner pre-installed, but other furniture and appliances for daily life like beds, couches, refrigerators, microwaves, and the like must be purchased by tenants on their own. TIU will not find apartments for its students, but the university does have a contracted English speaking agency available to assist students in their search.

Monthly Living Costs
As you move closer to the heart of Tokyo, the cost of living will increase, but there are plenty of affordable and convenient options for TIU students near the campus.

Total Cost of Life at TIU
When taking the factors mentioned above into consideration, we can estimate that the average cost of living and TIU tuition and fees with no scholarship would be roughly 2,290,000 yen ($20,818) for the first year. Even though Tokyo is widely known as one of the most expensive cities in the world, this is a dramatic misconception. Take some time to test out our 4-Year Calculator on our website to see exactly how much cheaper it is to study at TIU than some other popular study destinations via the link below.

Vasnika from India

I consider my experience at TIU to be memorable and full of exposure. Educational excursions, TIU Halloween parties, Sports Day, and exploring Japan with friends are just a few of my best experiences. The cultural diversity is seen on campus not only through the international students but also with the international cuisines that are offered in the cafeterias. The dormitories are quite close to campus, and I love walking to campus while feeling the fresh air and the beauty of the nearby nature. The university also takes care of students through various workshops, and provides peer assistants to help first-year students who are not well versed in Japanese. Last but not least, International Relations as a course in itself is wonderful, with the most supportive faculty, and I hope to achieve much success in my future endeavors by working hard on the path laid out for me by my professors and TIU.
In 2023, Tokyo International University will establish a new urban campus in Ikebukuro, right in the heart of Tokyo. The E-Track Program, as well as other educational globalization functions, will be centered on this new campus. The university is planning to relocate half of the student body (roughly 3,500 of 7,000 students), and amongst those 3,500 students, the aim is 2,000 international students from over 100 countries. The addition of the new Digital Business and Innovation major is a major initiative for TIU to reach this ambitious goal. This new campus will dramatically strengthen the foundation of the globalized education already present in TIU, as well as bolster the overall globalization of Ikebukuro.
