TOKYO INTERNATIONAL UNIVERSITY 2023

English Track Program 2023 Prospectus
Undergraduate Degrees

Business Economics
Digital Business and Innovation
International Relations
A University that Stands Tall Within the World

Tokyo International University’s Pledge

The founding philosophy of Tokyo International University is “nurturing truly internationally-minded people through Kotokushin, or unbiased harmony”. The essence of Kotokushin dates back to the 16th century when Francisco de Xavier (1506~1552), among others, conveyed Japan’s philosophy of Wa, or “harmony”, far throughout the international community.

It is under this founding philosophy that Tokyo International University hopes for the prosperity of a sustainable humanity and thus strives to invite renowned faculty from around the world to conduct academic research and educate our students. Particularly, as we develop all major fields to have an international outlook, we also provide an environment where the youth of the world can flourish and devote themselves fully to their education and research on behalf of the prosperity and togetherness of humanity.

Ladies and gentlemen, I look forward to you joining our university.

Nobuyasu Kurata
Chancellor and Chair, TIU

PROFILE: Nobuyasu Kurata, Chancellor and Chair, TIU

Born in 1937. Taught at Daito Bunka University as a professor and an emeritus. Served as an expert advisor for the Japan Society for the Promotion of Science. Active as president of the Mass Communication Research Institute. Published many research papers and scholarly treatises in books and magazines, including "Koutoukunokuni JAPAN," "Complete Works of Wang Yangming," co-author "Complete Works of Li Gang," "Yoshida Shoin" (Meitoku Shuppan) and "Lien Chan" (Waseda Shuppan). Accepted an honorary Doctorate in Humanities from Willamette University. Chancellor and Chair of TIU since September 2009, while also serving in various roles such as managing director of the Showa Economic Research Institute, and Director and Chairperson of Keishin-Gakuen Educational Group.
Refine true skills for success around the world. Earn your degree in the heart of Japan.

We created our English-medium undergraduate degree to provide international students interested in Japan with the opportunity to develop practical skills in three fields of importance to the global marketplace: business economics, digital business & innovation, and international relations. By 2023, we hope to grow to over 2,000 international students from over 100 countries.

**Numbers that Move**

- 6,500+ Students Enrolled Across Four Campuses in Two Countries
- 1,400+ Number of International Students Currently Enrolled at TIU
- 330+ Study Abroad Destinations (Exchange Partners + ISEP)
- 97.6% Job Offer Rate for TIU International Students (2021-22)
- 95% Growth Rate of TIU International Students (2021-22)
- 75 Countries Represented by Current TIU Students (2022)
- 75% Ratio of International Faculty at TIU (2022)

**Why Choose TIU**

- **Reason 01** Practical courses to refine skills
  Choose your own concentration module or study path to focus on the field that matches your interests.

- **Reason 02** World-class diversity in the capital of Japan
  Immerse yourself in an international environment with direct access to all of the opportunities Tokyo offers.

- **Reason 03** Active learning in small classes
  Develop a deeper expertise through direct and active communication with your professors.

- **Reason 04** Challenging Japanese courses for your career
  Develop and polish your Japanese prowess through intensive and specialized courses to attain business proficiency.

- **Reason 05** Study opportunities worldwide
  Explore your horizons through options in over 300 programs across 50+ countries.
Business Economics

Overview of the Major

The world we live in has a serious scarcity of resources. If we all could have unlimited access to goods, such as breathable air or drinkable water, the world would operate much smoother. However, since these resources are not abundant, we need to create an order of allocation to avoid conflicts or war (economics). Simultaneously, organizations and individuals prioritize certain economic activities in order to make a living by producing, buying, and selling commodities and services (business). Thus, by combining these core fundamentals, the Business Economics major was born.

Due to the vast array of fields in Business Economics, the major at TIU is separated into five concentration modules. Students will learn the diverse ways of analyzing economic activities that go beyond national boundaries, such as international trade and finance, while developing the actual skills to assess and determine order for the allocation of scarce resources. In addition, the many components of business will be thoroughly analyzed, while utilizing state-of-the-art IT to develop the skills to analyze markets and make the decisions required to build an organization with sound management. Mastery of the concepts found in the two core fields of business and economics will provide numerous opportunities in companies, ventures, banks, and consulting firms, among other global organizations, as well as a clear path towards an MBA or other advanced degrees.

I enjoy teaching in the E-Track Program because discussions are always interesting and I get to learn new perspectives from our diverse student body. I feel a major advantage of our program is this global perspective that students encounter throughout their time here. In my classes, I try to have discussions where students can share how their lived experiences align with or differ from theories taught in class. We also look at cases and analyze them together (for example, by using SWOT analysis) to deepen understanding of the actual skills to assess and determine order for the allocation of scarce resources.

Vanda from Thailand

My four years studying Business Economics at Tokyo International University (TIU) have been truly exceptional and a memory to cherish for a lifetime. The Business Economics major is a platform of practical learning which has prepared me for a career both in Japan and abroad. The classes here have taught me many valuable skills such as how to adapt to technological developments in the business world. It has shaped me into a more versatile person who is ready for new challenges. It also opened doors to new opportunities like exploring Japanese culture and studying abroad. Throughout the years, I have met many amazing teachers, friends and faculty members who loved to share their knowledge and gave support whenever I needed it.

Sumire Stanislawski
Associate Professor of Marketing
B.B.A., Simon Fraser University | M.A., Waseda University
BE Concentration Modules

The Business Economics major is separated into 5 different focus areas called concentration modules. It offers a wide range of courses including recently added digital business courses.

**Entrepreneurial Business**
- Digital Business Strategies
- Social Businesses in Japan
- Web and mobile technology
- Institutions and Business Transformation
- Social Media and Business
- Technology, Innovation and Entrepreneurship
- Entrepreneurial Strategies
- Start-up Funding and VC Strategies
- Principles of Marketing
- Mathematics for Business and Economics
- Statistics I
- Principles of Management
- Statistics II

**Economics**
- Behavioral Economics
- Macroeconomics
- Finance
- Development Economics
- Principles of Economics
- Health Economics
- Econometrics
- Statistics I
- Health Economics
- Game Theory
- Statistics II
- International Organization
- Financial Accounting
- Principles of Marketing
- Labor Economics
- Macroeconomics
- International Trade
- Mathematics for Business and Economics I
- Mathematics for Business and Economics II

**Management**
- Business Planning
- Managerial Accounting
- Business Communications & Productivities
- Corporate Finance
- Operations and Service Management
- Corporate Strategy
- Entrepreneurial Strategies
- Organizational Behavior
- Leadership, Creativity and Organizational Renewal
- Financial Accounting
- Principles of Marketing
- Service Management and Strategy
- Human Resources Management
- Principles of Management
- Global Supply Chain Management
- International Business
- Statistics I

**Marketing**
- Consumer Behavior
- Marketing Research
- Web and Mobile Technology
- Digital Marketing
- Marketing Strategy
- Database & Big Data
- Financial Accounting
- Principles of Marketing
- Digital Business Strategies
- Global Marketing
- Principles of Marketing
- Market Modeling
- Human Resources Management
- Statistics I
- Social Media and Business

**Finance**
- Corporate Finance
- Macroeconomics
- Managerial Accounting
- Finance
- Microeconomics
- Mathematics For Business and Economics I
- Financial Accounting
- Principles of Economics
- Statistics II
- International Finance
- Principles of Management
- Econometrics
- Investments
- Statistics II

**Overview of the Major**

Technology is leading the future and changing businesses everywhere. The Digital Business & Innovation (DBI) major was created to help today’s students adapt to the current workforce by building a bridge between business and technology. What this means is that students will obtain knowledge on how to innovate products, services, and business models by using new technology. Students will learn how to identify and conceptualize key technologies and platforms as well as how to adapt these to foster business innovation.

DBI is separated into six concentration modules focusing on different areas of digital business. Be it fintech, AI, programming, entrepreneurship, or business management, this major offers focus areas for anyone interested in a future-forward education. With the newly built Digital Discovery Lab on campus, DBI students will be able to develop and practice their skills in a cutting-edge learning environment with state-of-the-art equipment. Graduates will be able to land positions in several fields at globally prestigious companies that are leading the future, or move on and obtain an MBA in the same area of study.

**Graduate School of Economics (Master of Arts Degree)**

Teaching business economics in our interdependent and globalized world benefits from a mix of academic and practical knowledge, which I acquired from more than a decade of experience applying economics in business settings in a number of countries. Learning in a traditional lecture-based environment can be challenging for many students, so I adopt a few approaches to try to actively engage students in lectures. I incorporate practical exercises (usually Excel-based), that require students to apply theories learned in quantitative analyses. I believe encouraging student discussion in classes is vital; monologuing lectures rarely facilitates engaged learning and the development of critical analytical skills. Bringing passion and energy to the topics being taught, and linking theories to practical issues confronted in daily life, helps motivate students and makes it easier for them to relate to course content. I count myself lucky to teach at TIU, where the diverse backgrounds of students means they bring different interests and perspectives to business and economic issues. This often leads to new insights in class discussions.

Christopher Edmonds
Associate Professor of Development and International Economics

Shreya from India

We are currently living in a world dominated by the internet. It’s not a hidden truth that e-businesses, social media, e-learning, and hundreds of other services not only have an intensive technical, but also economic network. DBI smoothly integrates these two promising fields; business and technology. My DBI courses at TIU gave me a comprehensive understanding of upcoming technologies like artificial intelligence and machine learning. Moreover, the flexibility of TIU's curriculum allows me to coordinate my study plan by integrating technical as well as business courses. These not only help me to learn about engineering principles, but also understand their front end applications in the contemporary business world. I was able to apply the knowledge I gained in the hands-on projects that I worked on with my group during the career-practicum program organized by Tech Mahindra in partnership with TIU. For the same reasons, I was also able to secure an internship at a leading digital marketing analytics firm based in Silicon Valley as a content writer. In my opinion, DBI is the future. In the later course of my study, I aim to deepen my understanding of artificial intelligence while simultaneously working on business projects in this field.

Graduate School of Digital Marketing & Business (Master of Science Degree)

In the modern age, the demand for professionals in digital marketing far exceeds supply, leaving businesses franticly searching for globally oriented individuals with both business and IT skills. I have always been a quest for knowledge and am interested in learning novel things. My passion for digital marketing started during my undergraduate studies when my focus was on building e-commerce websites and coding. However, at that time there were no specialized majors in IT business, so I combined multiple degrees in related fields as well as pursued research on virtual and augmented reality to fill the gap. Later, I chose to study marketing analytics in Japan, the best destination for this purpose. TIU offers a globally competitive curriculum and specializations in IT business that encompasses digital marketing and analytics in one degree, making it the only program of its kind in Japan. The program covers topics ranging from social media and search engine optimization, online advertising, big data and analytics, to virtual and augmented reality, as well as courses covering breakthroughs in blockchain technologies and the internet-of-things. Students will also benefit from practical courses in state-of-the-art computer labs. This is your perfect opportunity to learn the skills that will lead you to further success!

Message from Chief Innovation Officer at Tech Mahindra

Makers Lab collaborated by giving TIU students the opportunity to learn global business collaboration through a full practical course delivered by world-class IT experts from our research campus in Pune, India jointly with faculty from TIU’s Digital Business and Innovation (DBI) program. The program allowed TIU’s J-Track students to study with E-Track students to explore how to use AI, IoT, and Block Chain in business. I am very pleased to hear that TIU attracted the attention of two global technology companies. One, Tech Mahindra, is one of India’s leading IT companies with more than 125,000 employees across 90 countries; the other, Gyrfalcon Technology Inc. (GTI) is a world-leading developer of high-performance Artificial Intelligence (AI) processors based in Silicon Valley. TIU students in the DBI program are privileged to cooperate with leading companies that connect them to the forefront of DX, supported by experienced faculty in their research, while gaining the practical skills necessary for the digital century.

Partnership with Leading Global IT Giant

Digital transformation, or DX, is exactly what has happened at TIU. We created a unique path for our students to tap into the opportunities created by the rapidly advancing digital century. Following the establishment of the DBI program, TIU attracted the attention of two global technology companies: One, Tech Mahindra, is one of India’s leading IT companies with more than 125,000 employees across 90 countries; the other, Gyrfalcon Technology Inc. (GTI) is a world-leading developer of high-performance Artificial Intelligence (AI) processors based in Silicon Valley. TIU students in the DBI program are privileged to cooperate with leading companies that connect them to the forefront of DX, supported by experienced faculty in their research, while gaining the practical skills necessary for the digital century.

Career Experience Practicum: TIU-TECHM Project

Students can even experience how cutting-edge business applications are developed by IT experts by taking a course co-developed by the DBI faculty with IT experts from the Makers Lab, Tech Mahindra’s IT Innovation Lab located in India. This career practicum provides invaluable hands-on experience for students.

Partnership with the European Organization for Nuclear Research (CERN)

TIU established a Memorandum of Understanding with CERN in Switzerland, becoming its third official cooperating organization in Japan. Professor Fatih Ozaydin will lend his expertise in the feasibility study for the development of a 100km Large Hadron Collider (LHC). The design research for this project has involved over 1,300 professionals from over 150 universities, research institutes, and corporations from around the world. TIU will continue to promote joint research with universities and institutes around the world, and will act as a base for global research.

Fatih Ozaydin Associate Professor of DBI

International Relations

Overview of the Major

International Relations is a field of study dealing with how nations with varying power, interests, and identity interact with each other in the absence of a global government. The discipline originated in the tragic experience of World War I, when unprecedented devastation called for a systematic inquiry into the causes of war and conditions for peace. Since then, the range of issues covered in the discipline has expanded to include economic interdependence, international organizations, terrorism, poverty, human rights, and climate change, among others.

International Relations as a discipline is not just about what is happening around the world. We study why countries and national leaders behave the way they do, using different intellectual lenses called theories. When discussing global issues such as nuclear proliferation, terrorism, refugees, hunger, and global warming, there is no such thing as a “correct answer” that satisfies everyone. The important thing is that you respect different viewpoints and work to find common ground.

Classroom discussions provide valuable opportunities for students with diverse cultural backgrounds to present their views and learn from each other. The skills learned are extremely useful not only in the way students approach their daily lives, but also in their future workplace, be it a multinational firm, government, or international organization. The International Relations major is for students who want to contribute to international societies as global citizens.

I became interested in the issue of war and peace when I was seventeen and lived in the United States for a year as a high school exchange student. The experience left me with a lot of fun and precious memories but also with a long-lasting puzzle: why did Japan fight a war with the United States during World War II? My personal relationship with my host family, classmates, teachers, and other members of the community was such that it was almost unimaginable for me that the two countries fought a bloody war in the not-so-distant past. How can close friends so suddenly become major enemies? These questions led me to choose international relations as my major when I came back to Japan and went to college.

I have been fascinated by social sciences and all of its dynamics since I was in high school. I believe the key role that is played by social sciences is to explain and predict what could happen in this ever-changing world of ours. I wanted to know more about the dynamics of the world, and possibly make it a better place for everyone. I know the moment I saw the core studies in this discipline that this was the right place for me. The skills I have acquired through my studies at TIU will be helpful in problem solving and analysis.

Akitoshi Miyashita
Dean of E-Track and Professor of International Relations
B.A. Tokyo International University, M.A. American University, Ph.D. Columbia University

IR Concentration Modules

Courses within the IR major have been organized into four “subfields.” Find the subfield that matches your interests for recommended courses to take to meet your individual goals.

**Global Governance**
- International Law
  - Understanding Globalization
- International Politics
  - Introduction to Sociology
- International Organization
  - Global Sociology
- Human Rights
  - Political Economy Development
- International Environmental Policy
  - Political Theory
- Transitional Justice
  - International Development
- International Relations in the Asia of AI

**International Security**
- International Security
  - International Political Economy
- Maritime Safety and Security
  - International Politics
- Non-state Actors and Political Violence
  - Maritime Security and Ocean Governance
- War and Peace in East Asia
  - Chinese Politics in Comparative Perspective
- Introduction to Social Psychology
  - International Relations of South Asian
- Comparative Politics
  - International Relations of Southeast Asia

**International Political Economy**
- International Political Economy
  - Comparative Politics
- International Development
  - Understanding Globalization
- International Integration
  - International Environmental Policy
- Political Economy of Development
  - International Relations of Asia-Pacific
- Sustainable Society
  - International Relations of South Asia

**Culture and Society**
- Comparative Culture
  - Tourism: Analysis and Planning
- Global Sociology
  - Pre-modern Japanese Literature
- Gender in International Relations
  - Contemporary Japanese Literature
- Japanese Popular Culture
  - Gender in International Relations
- Japanese Society
  - Introduction to Social Psychology
- Issues in Popular Culture
  - Introduction to Sociology
- Media and Society in Japan
  - Sustainable Society
- International Relations of Japan

* Refer to the E-Track website for the most current and complete list of courses.

Graduate School of International Relations (Master of Arts Degree)

Poverty and underdevelopment in my country led me to pursue further education in Japan. Upon arriving in Japan, I had the opportunity to study at TIU’s Graduate School of Economics, where I obtained my MA and PhD in Economics. The knowledge that I acquired helped me to understand why some countries are underdeveloped and others are developed. It is exciting and fascinating to be teaching in TIU because you always can engage students from diverse backgrounds who provide real-life experiences illustrating the theories and issues that we learn in class. IR at TIU offers students the opportunity to study a wide range of problems and issues that have a global impact. In my teaching, I want my students to master the dynamics of globalization and become knowledgeable in economic theories that will help them to be creative and skillful in domestic and international negotiations. I also motivate my students to acquire practical skills in data handling and empirical analysis, which can sometimes be challenging for some IR students but important for their future careers.

Samuel Amponsah
Associate Professor of Economics
M.A. & Ph.D. Tokyo International University

Message from the Dean of E-Track Program

I would like to welcome you to the Graduate School of International Relations (Master of Arts Degree). It is exciting to see students from diverse backgrounds who provide real-life experiences illustrating the theories and issues that we learn in class. At TIU, we are dedicated to preparing students for their future careers by offering a wide range of programs and courses that will help them to be creative and skillful in domestic and international negotiations. I also encourage my students to acquire practical skills in data handling and empirical analysis, which can sometimes be challenging but important for their future careers.

I have a lot of positive feelings about the TIU MUN. The varsity team originated in 2017, and since then the team has already attended numerous conferences and made a great impression on the other schools in attendance. At the All Japan MUN in December 2017, our varsity team members took home half of the total awards, and I was humbled to be named the Best Delegate of the UNHRC Committee.

In addition, in July 2018 TIU hosted its first international MUN conference, with delegates who traveled from countries around the world in attendance. However, I truly do believe that we can go even further than this. We are aiming to attend more conferences outside of Japan, especially the most prestigious ones in the US and the UK. I am looking forward to continuing my involvement in the MUN even after graduation, and know there are great things in store for the TIU team.

Wichuta Teeratanabodee
International Relations Alumna (2018) and Former President of the TIU MUN

The TIU Global Dialogue is an international speaker series organized by Tokyo International University’s (TIU) E-Track International Relations (IR) program. Established in 2019, our Global Dialogue brings top experts, academics and policy practitioners from the many fields of international affairs—politics, diplomacy, military, economics, and industry—to TIU to share research findings, and discuss issues of strategic importance to Japan and the world.

Our TIU Global Dialogue sessions offer our IR students a unique opportunity to hear directly from those who are involved in shaping foreign policy, and also scholars who are invited to present their cutting-edge research to our student and faculty community. Recently, we were delighted to welcome Mr. Daniel Russel, who served in a number of senior U.S. Diplomatic positions, including Assistant Secretary of State, Special Assistant to President Barack Obama and National Security Council Director for Asian Affairs. Mr. Russel was able to lift the veil on the U.S. foreign policymaking process in his talk, and he also answered student questions about President Biden’s foreign policy in Asia. As an IR student at TIU, you will be able to regularly join these monthly events and start networking with leading practitioners and scholars in IR.

You can follow our events on our YouTube channel: Tokyo International University: Global Dialogue

I have a lot of positive feelings about the TIU MUN. The varsity team originated in 2017, and since then the team has already attended numerous conferences and made a great impression on the other schools in attendance. At the All Japan MUN in December 2017, our varsity team members took home half of the total awards, and I was humbled to be named the Best Delegate of the UNHRC Committee. In addition, in July 2018 TIU hosted its first international MUN conference, with delegates who traveled from countries around the world in attendance. However, I truly do believe that we can go even further than this. We are aiming to attend more conferences outside of Japan, especially the most prestigious ones in the US and the UK. I am looking forward to continuing my involvement in the MUN even after graduation, and know there are great things in store for the TIU team.

Wichuta Teeratanabodee
International Relations Alumna (2018) and Former President of the TIU MUN

The Model United Nations at TIU is a varsity team with over 60 members from 15 countries around the world, and has become the first university team founded by international students. The MUN is a simulation of conversations and debates held in the same fashion as the actual United Nations, and the diverse student body at TIU makes it the ideal environment to get first-hand experience with the unique cultures and values of people around the world. With coaching from Thomas Blackwood, Professor of Sociology, the club members select a president to lead the team through weekly mock discussions and debates in preparation for conferences across the globe. Students new to the university and Japan find the MUN a great way to feel at home in a new culture, while developing academic knowledge in addition to soft skills like public speaking, debating, and writing.

General Education

TIU's general education courses are designed to broaden your general knowledge while developing a strong academic foundation. By pursuing a wide range of interdisciplinary courses, you will deepen your understanding of fundamental social issues and grow into a truly international-minded person.

Liberal Arts

The liberal arts courses are a way for students to take fundamental courses relevant to their major during their first year. While some are required depending on a student’s major, a wide range is offered for students to develop a broad comprehension on a variety of subjects.

- Fundamentals of Mathematics
- Principles of Management
- Introduction to Social Psychology
- Introduction to Sociology
- Statistics I

1. Refer to the E-Track website for the most current and complete list of courses.

Japanese Language

Students in their first semester at TIU learn Japanese in a small class setting four days a week. Instructors help students with no prior Japanese experience develop fluent Japanese skills by the time they graduate and work to push students who have already studied Japanese to even higher levels of proficiency.

The Japanese Language Institute supports international students in every aspect regarding Japanese language acquisition. There are two major missions of Japanese language education at the JLI: to build communicative ability for students’ daily lives and to prepare them with the business level proficiency required for entering the Japanese workforce. With these goals in mind, the JLI has established a series of tiers to TIU’s Japanese language education to ensure that each student is enrolled in the level that is most suited to their individual needs. Currently, there are 20 instructors within the JLI that allow TIU to maintain a small classroom size, as well as catered one-on-one advisory after class when students have free time. It brings us great joy to work together with international students to keep them motivated to study Japanese and eventually make it a common language for life.

The first year will focus on academic writing, analytical thinking as well as Japanese language courses for students to not only adapt to life in Japan, but to prepare them for more intense high-level courses offered from their second year and onward. In combination with liberal arts courses, students will be able to apply the skills they have gained the first year towards their major studies.

Andreas from Sweden

I have always held an interest in international relations and Japan’s very unique culture. Upon discovering TIU and its international relations major, I felt it was the perfect fit for me. One of the major challenges I saw in front of me was the Japanese language, since I had no prior knowledge. However, TIU made this challenge significantly more surmountable. TIU offers its international students a great amount of exposure to the Japanese language, such as at the Japanese Plaza and clubs where you can engage with the Japanese students. The Japanese classes are intensive and the professors ensure every student is able to follow the lessons, which leads to fast and steady learning. After just a couple of months, I can now understand and engage in basic conversation, and I look forward to learning more here at TIU.

1. 1st Year Sample Semester
Opportunities at Willamette U.

TIU’s sister school relationship with Willamette University provides students with a number of opportunities to enhance the scope of their university takeaways.

Double Degree Program

High achievers have the opportunity to spend 2.5 years at TIU in Japan, then move on to their final 2 years at WU in the United States to earn two bachelor’s degrees at the same time in a total of 4.5 years!

Atkinson MBA

Willamette University’s Atkinson Graduate School of Management is offering TIU graduates the same enrollment and scholarship benefits as their own alumni. This is a great opportunity to plunge into business management after your time at TIU.

Study Abroad Programs

TIU is one of the only universities in Japan affiliated with ISEP (the International Student Exchange Program), a global organization promoting international exchange for one or two semesters. This program opens up opportunities to study at over 300 of its affiliated universities in over 50+ countries around the world. More and more TIU students are taking advantage of this affordable opportunity, with popular study destinations being North America, Europe, and Australia. In addition, TIU has special exchange agreements with 28 universities in 21 countries, including double degree opportunities at both Willamette University and Southern Oregon University, USA.

Study Abroad Stories

Mavy from Russia

I love traveling around the world and experiencing new things, so last summer I decided to apply for ISEP and do an exchange program at La Trobe University in Melbourne, Australia. I’ve only been here two months yet I am already in love with this place. I experienced so many new things here that I’m excited to bring back to TIU when I finish the semester abroad. In the two months since I have moved here, I am meeting new people, making friends, getting used to a new culture, challenging myself, learning new methods of teaching, and so much more!
Career Support

International students have unlimited access to the Career Center, where they can receive one-on-one advising with career specialists. This great resource prepares students for the job hunt with a focus on career development through a variety of events and guidance sessions created to help students’ careers after graduation.

The Career Center also provides guidance for internships, interview tips and practice, insight into career paths, as well as seminars on important topics to help students succeed in the next chapter in their life. In addition, the Career Center also invites outside companies for exclusive on-campus information sessions. These sessions provide students with the opportunity to speak with real employees and learn about the status quo of the workforce.

In order for TIU students to gain an accurate insight into the job hunting process, presentations and discussion sessions by guest employees and learn about the status quo of the workforce.

Academic Advisory

Students at TIU come with their own unique career goals from countries and economies far and wide. Some aim to work in Japan, while others plan to pursue global careers or advance to graduate programs around the world. Academic advisors at TIU offer support to students of diverse backgrounds through individual career counseling sessions, development programs, and specialized courses where students can receive credits towards graduation. With expertise spanning across countless cultures and countries, these advisors help students come up with career plans, as well as extinguish any concerns, doubts or uncertainties. Academic advisory is a team effort to provide catered support, advice, and encouragement day by day with the mission of assisting students in achieving their individual goals after graduation.

Kuniko Ishiguro
Associate Professor of Management
B.A., Gakushuin University | M.S., Ph.D., University of Sheffield

Beyond TIU

TIU > University of London, United Kingdom

After graduating from TIU, I worked as a tech consultant at a multinational consulting firm, and then as a data scientist at a leading data-driven start-up in Thailand. Currently, I am a postgraduate student conducting research to help companies develop data-driven strategies to capture their greatest opportunities in the digital era. This provided me with great opportunities to cultivate multidisciplinary skills to gain a competitive edge in the job market and postgraduate admission. The professors at TIU were also immensely helpful. It was a blessing to learn from professors from around the world, and they were always happy to provide me with guidance both during and after my life at TIU.

Voravich Chaturavichanan (Thailand)
Business Economics, Graduated in 2019

TIU > Central European University, Austria

The first two people I messaged about my admission to the Ph.D. program in Political Science at CEU were Professor Chen and Professor Blackwood. In many ways, I owe my achievements to their unwavering support. I knew I wanted to stay in academia, which requires a lot of long-term planning. However, I had only a vague idea of the requirements. This situation propelled me to turn to my professors for advice, but they did more than that: they mentored me through the entire process, provided me with a research assistantship opportunity, and wrote me letters of recommendation. Because of this, I am now doing my Ph.D. at one of the leading institutions in Europe. I still remember how my time at TIU has been a stepping stone for my career path.

Ton Nu Thuy Duong (Vietnam)
International Relations, Graduated in 2019

Sylvie from the Netherlands

As a BE student aspiring for a career in digital marketing, I realized that in addition to marketing, knowledge and practical experience about coding and IT would be essential for success in this field. Thus, this past spring break I interned at an IT company in Osaka for 6 weeks. I started by learning the basics, and was later given assignments to tackle and showcase my takeaways from the experience. The company had other interns as well from many different countries, so whenever I had a question I could ask them or the staff working around me for help! After this experience, I signed up for Professor Sharkasi’s digital marketing course and I am really excited to put the concepts and practical skills I am refining to use!

Tran Linh Chi from Vietnam

Knowing the hiring process for new graduates in Japan, I began utilizing the TIU Career Center as early as I could. I knew I would have an advantage by starting early, so with the help of TIU, I interned at several companies during my second year. I knew the internships were going to be challenging, as I had to speak Japanese. Thankfully TIU offers Japanese courses all the way through business and advanced levels, which helped me not only in my internships but also when interviewing for jobs. I chose to look for jobs in Japan due to the fact that Japanese companies are very open to new graduates. Companies will focus on your potential and invest time and effort into training you into a skilled professional. By believing in yourself and persevering, employees will see your potential and support you in your journey, so just keep working hard! Your journey, so just keep on working hard!
Upon entering the highest bracket of Japan’s university soccer league (Division 1) in 2018, TIU’s varsity team has seen great success across the board. The sprawling Sakado Campus is home to the majority of TIU’s varsity teams. It boasts world-class grounds that are meticulously maintained according to pro-level regulations and supports the highest level of intramural competition. All varsity teams welcome international students with open arms, and provide an invaluable way to assimilate into a new country. The sports facilities on this campus are not widely available at universities in Japan, and provide a great opportunity to make friends in new surroundings as well as maintain a healthy study balance in your daily life.

**Varsity Soccer Team**

TEDxTIU is a student organization with the goal of providing a platform to the TIU community for the exchange of ideas through self-organized workshops and licensed TEDx events. This varsity club facilitates the development of new and existing skills vital in post-undergraduate life such as leadership, communication, and event-organization. Beyond this, members are able to meet other talented students and form great bonds, breaking cultural and linguistic barriers.

**Varsity Archery Team**

The archery grounds at TIU are nestled in a quiet, outdoor field of completely natural grass that is perfect for training and official competitions. While archery as a sport requires great discipline and persistence as an individual, international students have found their place in this club thanks to the welcoming team dynamic. Tarkan Koc, a transfer student from Germany, was introduced to this club by a classmate and “hooked” due to the sense of accomplishment after improving his shooting distance. Students who do not have their own bow may borrow one from the university, so anyone can join. Tarkan’s favorite takeaway is “seeing other students constantly improving”.

**Varsity TEDxTIU Team**

The International Festival 2019

**Wind Orchestra**

**Photography Club**

**Campus Activities**

From cultural events to sports and culture clubs, there are endless ways to get involved with the community in and around TIU.

The Japanese Plaza has a relaxed environment that is perfect for international students to meet Japanese classmates and teachers for a chance to utilize the skills learned in the classroom.

TIU has three campuses in Japan that are fully equipped with state-of-the-art facilities to support students both mentally and physically.

Campus Facilities

Campus 1
Home to E-Track students with facilities that support a rich campus life, including classrooms, professors’ offices, a library, laboratories, student support offices, plazas, an auditorium, two cafeterias (including one that offers halal and vegetarian food), and a convenience store.

Sakado Campus
The Sakado campus contains all of our major sports clubs. With state-of-the-art facilities and assistance from professional coaches, students are able to flourish as part of a larger unit, which can be a great asset in academia as well.

English Plaza
A multipurpose language center, the English Plaza has a casual atmosphere for studying and socializing. Students can use the adjacent café lounge, making for an ideal study environment.

Japanese Plaza
The Japanese Plaza has a relaxed environment that is perfect for international students to meet Japanese classmates and teachers for a chance to utilize the skills learned in the classroom.

Support Offices
Several offices are located on campus specifically to help international students throughout their studies at TIU. Whether it be support with visa applications, housing, scholarships, part-time jobs, internships, job fairs or how to build a strong resume, students can always find a helping hand.
Sabrina from Indonesia

When I first moved to Japan, it was my first time living on my own. Thus, one of the most important elements that helped me settle in to my new environment was making friends. I live together at the R5 dormitory with people of many different nationalities, which has helped me diversify as a person. However, one of the biggest challenges I had when I first landed here was the language barrier. Even though majors are taught in English, I have been taking Japanese language classes at TIU to help me overcome this. This has improved my confidence in speaking dramatically.

For me, the key to surviving school is to be friendly with everyone and eager to learn, because people will happily be friends with you.

Campus Facilities

Library
The library at TIU is equipped with thousands of books and academic journals in English for students to utilize. Through the computers available, students are also able to access endless material via online services. Study spaces are located throughout the library for students who want to read in a quiet environment.

Cafeteria
In addition to several food trucks and an on-campus convenience store, our main campus has two cafeterias with various menu options that change weekly. As of spring 2019, one of our cafeterias was renovated, and an all-Halal and vegetarian menu was introduced.

Laboratory
Opened in the spring of 2019, the new Digital Discovery Lab (DDL) functions as one of several labs that enables DBI students to maximize their potential.

Library
TIU provides both single and shared dormitories to allow students to choose the option most suitable for their individual lifestyles. Our newest addition to our dormitories is the all-girls dormitory, R5. All E-Track students at TIU are welcome to live at our dormitories for up to one year.

Gymnasium
While Sakado Campus is the center for sports at TIU, campuses 1 & 2 are also equipped with gymnasiums and fitness gyms for our students to use, whether for clubs or personal use.

Dorms
Our dorm rooms are fully equipped with beds, closets, refrigerators, stoves, sinks, showers, and toilets.
The TIU E-Track Alumni Association (or, TIU EAA) is the official alumni association of the Tokyo International University. It was founded in March 2019 on the initiative of TIU and TIU alumni who saw it as their goal and passion to connect TIU students after graduation. TIU has nurtured internationally-minded students and this Association will keep them in touch across countries for a lifetime.

The TIU EAA is here to support and guide TIU alumni on their career path, offer them the benefit of staying connected with alumni peers and benefit from the vast, international TIU network.

Who We Are

Studying at TIU was one of my most life-changing experiences. I really enjoyed the IR major, which allowed me to specialize in Japanese and Asian Pacific politics. During my time at the University of Sheffield, I continued to stay heavily involved in university affairs by taking the responsibility of several representative positions within the university.

Cost of Living

Dormitories
In order to foster a safe and comfortable learning environment, TIU operates dormitories in and around campus for students coming to Japan for the first time. We have 250+ dorm rooms available for international students, offering both single and shared rooms. Dormitory managers and Residential Assistants are available on-site to help international students as they adapt to their new life in Japan.

<table>
<thead>
<tr>
<th>Monthly Fee</th>
<th>Move in Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Single Room</td>
<td>JPY 39,000 (US$325) (utilities fees not included) — JPY 55,000 (US$450) (utilities fees included)</td>
</tr>
<tr>
<td>Shared Room (2 or 3 residents)</td>
<td>JPY 27,000 (US$225) (utilities fees included) — JPY 49,000 (US$400) (utilities fees included)</td>
</tr>
</tbody>
</table>

* The numbers in parentheses indicate the approximate amount in USD at the estimated exchange rate of $1 = 120 yen.
* Dormitory costs vary depending on factors such as location, building, layout, room type, etc. In general, newer dorms are at a higher price range.

For more details about dormitories and life at TIU, scan this QR code or access:
https://www.tiu.ac.jp/etrack/life/facilities.html

Renting Apartments in Japan
It is easy to find affordable apartments in the areas surrounding TIU’s campuses. The actual monthly rent of apartments differs dramatically based on size and location, though it is realistic to expect to pay between 30,000 and 50,000 yen ($250 ~ $416) per month. Students have the option to live alone in a studio apartment, or live together with a friend or classmate in a shared apartment. While most apartments are not furnished, some real estate agencies do have furnished options available at a higher monthly price. Unfurnished apartments may have an air conditioner pre-installed, but other furniture and appliances for daily life like beds, couches, refrigerators, microwaves, and the like must be purchased by tenants on their own. TIU will not find apartments for its students, but the university does have a contracted English speaking agency available to assist students in their search.

<table>
<thead>
<tr>
<th>Monthly Living Costs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Apartment rent, utilities, food, and other bills. As you move closer to the heart of Tokyo, the cost of living will increase, but there are plenty of affordable and convenient options for TIU students near the campus.</td>
</tr>
</tbody>
</table>

Total Cost of Living at TIU
When taking the factors mentioned above into consideration, we can estimate that the average cost of living and TIU tuition and fees with no scholarship would be roughly 2,290,000 yen ($19,083) for the first year. Although Tokyo is thought to be one of the most expensive cities in the world, this is a dramatic misconception. Students are often pleasantly surprised at how affordable Tokyo is compared to other global cities.

Eligibility

1. First year applicants: High School Diploma (12-year curriculum)
2. Transfer applicants: Earned the amount of credits equivalent to 1 or 2 years of a 4-year degree program
3. English proficiency:

Vaalamika from India
I consider my experience at TIU to be memorable and full of exposure. Educational excursions, TIU Halloween parties, Sports Day, and exploring Japan with friends are just a few of my best experiences. The cultural diversity is seen on campus not only through the international students but also with the international cuisines that are offered in the cafeterias. The dormitories are quite close to campus, and I love walking to campus while feeling the fresh air and the beauty of the nearby nature. The university also takes care of students through various workshops, and provides peer assistants to help first-year students who are not well versed in Japanese. Last, but not least, International Relations as a course in itself is wonderful, with the most supportive faculty, and I hope to achieve much success in my future endeavors by working hard on the path laid out for me by my professors and TIU.
In 2023, Tokyo International University will establish a new urban campus in Ikebukuro, right in the heart of Tokyo. The E-Track Program, as well as other educational globalization functions, will be centered on this new campus. The university is planning to relocate half of the student body (roughly 3,500 of 7,000 students), and amongst those 3,500 students, the aim is 2,000 international students from over 100 countries. The addition of the new Digital Business and Innovation major is a major initiative for TIU to reach this ambitious goal. This new campus will dramatically strengthen the foundation of the globalized education already present in TIU, as well as bolster the overall globalization of Ikebukuro.

Watch the CGI Concept video via the QR code above, or type in the keywords “TIU Ikebukuro” directly on YouTube.
