Business Economics

Students will learn diverse ways of analyzing economic activities that go beyond national boundaries, such as international trade and finance, while developing assessment and analytical skills. Students will learn how to analyze different markets and develop the decision-making skills required to build an organization with sound management. Mastering the concepts found in the two core fields of business and economics will help students prepare for their careers.

Digital Business & Innovation

Technology is leading the future and changing business everywhere. The Digital Business & Innovation (DBI) major helps students adapt to the changing work environment by building a bridge between business and technology. Students may take courses in AI, deep learning, digital marketing, programming, management, entrepreneurship, and more. Through such courses, students will learn how to identify, conceptualize, and adapt key technologies to foster business innovation.

DBI Concentration Modules

International Finance	Money & Banking
Digital Business Management	
Principles of Management	Digital Business Strategies
Database & Big Data	Global Supply Chain Management
Operations & Service Management	Human Resource Management

* Refer to the E-Track website for the most current and complete list of courses.

International Relations

International Relations studies the interactions between nations and cultures. While studying topics such as international organizations, human rights, climate change, and conflict and peace, students develop career-critical skills in leadership, communication, and research. Classroom discussions with other international students provide valuable learning experiences and unique perspectives, cultivating a deep understanding of global dynamics and equipping students to tackle complex challenges in our interconnected world.

IR Concentration Modules

Global Governance		
International Law	International Politics	Japan and the Islamic World
International Organization	Political Theory	International Relations of Europe
Human Rights	International Development	Transitional Justice
International Environmental Policy	International Integration	Introduction to Cultural Anthropology
Comparative Political Institutions		
International Security		
International Security	Maritime Security and Ocean Governance	Japanese Politics in Comparative Perspective
War and Peace in East Asia	Chinese Politics in Comparative Perspective	U.S. Politics toward Asia

Japanese Popular Culture	Gender in International Relations	Media and Society in Japan
Japanese Society	Introduction to Social Psychology	Introduction to Sociology
Introduction to Cultural Anthropology		

* Refer to the E-Track website for the most current and complete list of courses.

Japanese Language

Japanese classes at TIU help students better adjust to local life and prepare for a career in Japan. Beginner students are required to take elementary Japanese in their first semester and have the option of continuing study at advanced and business levels to achieve fluency by the time they graduate.

Career Support

The TIU Career Center offers one-on-one advising, internships, and other services to help students maximize their employability. The Career Center helps guide students in navigating the Japanese job-hunting system and provides information on a wide variety of job opportunities.
