

TOKYO INTERNATIONAL UNIVERSITY 2023

English Track Program 2023 Prospectus
Undergraduate Degrees

Business Economics
Digital Business and Innovation
International Relations

A University that Stands Tall Within the World

Tokyo International University's Pledge

The founding philosophy of Tokyo International University is “nurturing truly internationally-minded people through *Kotokushin*, or *unbiased harmony*”. The essence of *Kotokushin* dates back to the 16th century when Francisco de Xavier (1506~1552), among others, conveyed Japan's philosophy of *Wa*, or “harmony”, far throughout the international community.

It is under this founding philosophy that Tokyo International University hopes for the prosperity of a sustainable humanity and thus strives to invite renowned faculty from around the world to conduct academic research and educate our students. Particularly, as we develop all major fields to have an international outlook, we also provide an environment where the youth of the world can flourish and devote themselves fully to their education and research on behalf of the prosperity and togetherness of humanity.

Ladies and gentlemen, I look forward to you joining our university.

Nobuyasu Kurata

Chancellor and Chair, TIU

PROFILE: Nobuyasu Kurata, Chancellor and Chair, TIU

Born in 1937. Taught at Daito Bunka University as a professor and an emeritus. Served as an expert advisor for the Japan Society for the Promotion of Science. Active as president of the Mass Communication Research Institute. Published many research papers and scholarly treaties in books and magazines, including “Koutokunokuni JAPAN,” “Complete Works of Wang Yangming,” co-author “Complete Works of Li Gang,” “Yoshida Shoin” (Meitoku Shuppan) and “Lien Chan” (Waseda Shuppan). Accepted an honorary Doctorate in Humanities from Willamette University. Chancellor and Chair of TIU since September 2009, while also serving in various roles such as managing director of the Showa Economic Research Institute, and Director and Chairperson of Keishin-Gakuen Educational Group.

Refine true skills for success around the world. Earn your degree in the heart of Japan.

TIU created our English-medium undergraduate degree to provide international students interested in Japan with the opportunity to develop practical skills in three fields of importance to the global marketplace: business economics, digital business & innovation, and international relations. By 2023, we hope to grow to over 2,000 international students from over 100 countries.

Why Choose TIU

Reason 01 Practical courses to refine skills

Choose your own concentration module or study path to focus on the field that matches your interests.

Reason 02 World-class diversity in the capital of Japan

Immerse yourself in an international environment with direct access to all of the opportunities Tokyo offers.

Reason 03 Active learning in small classes

Develop a deeper expertise through direct and active communication with your professors.

Reason 04 Challenging Japanese courses for your career

Develop and polish your Japanese prowess through intensive and specialized courses to attain business proficiency.

Reason 05 Study opportunities worldwide

Explore your horizons through options in over 300 programs across 50+ countries.

Business Economics

Overview of the Major

The world we live in has a serious scarcity of resources. If we all could have unlimited access to goods, such as breathable air or drinkable water, the world would operate much smoother. However, since these resources are not abundant, we need to create an order of allocation to avoid conflicts or war (economics). Simultaneously, organizations and individuals prioritize certain economic activities in order to make a living by producing, buying, and selling commodities and services (business). Thus, by combining these core fundamentals, the Business Economics major was born.

Due to the vast array of fields in Business Economics, the major at TIU is separated into five concentration modules. Students will learn the diverse ways of analyzing economic activities that go beyond national boundaries, such as international trade and finance, while developing the actual skills to assess and determine order for the allocation of scarce resources. In addition, the many components of business will be thoroughly analyzed, while utilizing state-of-the-art IT to develop the skills to analyze markets and make the decisions required to build an organization with sound management. Mastery of the concepts found in the two core fields of business and economics will provide numerous opportunities in companies, ventures, banks, and consulting firms, among other global organizations, as well as a clear path towards an MBA or other advanced degrees.

I enjoy teaching in the E-Track Program because discussions are always interesting and I get to learn new perspectives from our diverse student body. I feel a major advantage of our program is this global perspective that students encounter throughout their time here. In my classes, I try to have discussions where students can share how their lived experiences align with or differ from theories taught in class. We also look at cases and analyze them together (for example, by using SWOT analysis) to deepen understanding of how concepts learned in class play out in the real world of business. Emerging business leaders need to be able to communicate cross-culturally and analyze complexities from an informed perspective. I believe our program offers a solid opportunity for students to gain such skills, both in and out of class.

Sumire Stanislawski

Associate Professor of Marketing
B.B.A., Simon Fraser University | M.A., Waseda University

Message from TIU Institute for International Strategy

I studied Engineering at Kyoto University, Japan, and joined Massachusetts Institute of Technology (MIT) to explore Management and Operations Research. MIT is a global institution where top students and faculty from all over the world gather and engage in cutting-edge research. At first, I was surprised to discover how very challenging the curriculum was. Fortunately, it was well-thought out and the faculty delivered it wonderfully well. My former classmates and I worked hard together, and we developed lasting friendships. Through my efforts, I was able to master what I learned. I developed confidence as a professional, which helped me throughout my career. Similar to my experience at MIT, TIU provides a truly global learning environment with a professional focus on the social sciences. Join our community of top students and learn from some of the best faculty in the world as you engage in rewarding research that will contribute not only to your future career, but to society as a whole.

Hirofumi Matsuo

Director of the TIU Institute for International Strategy and Professor of Operations Management
B.E. / M.E. Kyoto University | Ph.D. Massachusetts Institute of Technology

Business Economics Faculty

Samuel Amponsah

Associate Professor of Economics
B.A. University of Cape Coast | M.A. / Ph.D. Tokyo International University

Jau-er Chen

Associate Professor of Economics
B.A. / M.A. National Chung Cheng University, Taiwan | Ph.D. New York University

Christopher Edmonds

Associate Professor of Development and International Economics
B.S., Cornell University | M.A. University of Chicago
M.S. / Ph.D. University of California-Berkeley

Rangga Handika

Associate Professor of Finance
B.S. Universitas Indonesia, Indonesia | M.Com. / Ph.D. Macquarie University, Australia
Dr.rer.pol Georg-August-Universität Göttingen, Germany

Kuniko Ishiguro

Professor of Management
B.A. Gakushuin University | M.Sc. / Ph.D. University of Sheffield

Vasily Lubashevskiy

Assistant Professor of Applied Mathematics
B.E. / M.E. Moscow Technological University (MIREA)
Ph.D. The University of Tokyo, School of Engineering

David Methe

Professor of Business Economics
Ph.D. University of California

Rajarshi Mitra

Associate Professor of Economics
B.A. / M.A. Visva-Bharati University | Ph.D. University of Wisconsin-Milwaukee

Kayhan Tajeddini

Professor of International Business
B.A. Tehran University | M.A. Mazandaran University | Ph.D. Bradford University

Yasuhiko Toride

Professor of Business Administration
B.A. / M.S. / Ph.D. The University of Tokyo

Vanda from Thailand

My four years studying Business Economics at Tokyo International University (TIU) have been truly exceptional and a memory to cherish for a lifetime. The Business Economics major is a platform of practical learning which has prepared me for a career both in Japan and abroad. The classes here have taught me many valuable skills such as how to adapt to technological developments in the business world. It has shaped me into a more versatile person who is ready for new challenges. It also opened doors to new opportunities like exploring Japanese culture and studying abroad. Throughout the years, I have met many amazing teachers, friends and faculty members who loved to share their knowledge and gave support whenever I needed it.

BE Concentration Modules

The Business Economics major is separated into 5 different focus areas called concentration modules. It offers a wide range of courses including recently added digital business courses.

Entrepreneurial Business		
Digital Business Strategies	Social Businesses in Japan	Web and mobile technology
Institutions and Business Transformation	Social Media and Business	Technology, Innovation and Entrepreneurship
Entrepreneurial Strategies	Start-up Funding and VC Strategies	Principles of Marketing
Mathematics for Business and Economics	Statistics I	
Principles of Management	Statistics II	
Economics		
Behavioral Economics	Microeconomics	Finance
Development Economics	Principles of Economics	Health Economics
Econometrics	Statistics I	Industrial Organization
Game Theory	Statistics II	International Finance
Macroeconomics	International Trade	Labor Economics
Mathematics for Business and Economics I	Mathematics for Business and Economics II	
Management		
Business Planning	Managerial Accounting	Business Communications & Productivities
Corporate Finance	Operations and Service Management	Corporate Strategy
Entrepreneurial Strategies	Organizational Behavior	Leadership, Creativity and Organizational Renewal
Financial Accounting	Principles of Marketing	Service Management and Strategy
Human Resources Management	Principles of Management	Global Supply Chain Management
International Business	Statistics I	
Marketing		
Consumer Behavior	Marketing Research	Web and Mobile Technology
Digital Marketing	Marketing Strategy	Database & Big Data
Financial Accounting	Principles of Management	Digital Business Strategies
Global Marketing	Principles of Marketing	Market Modeling
Human Resources Management	Statistics I	Social Media and Business
Finance		
Corporate Finance	Macroeconomics	Managerial Accounting
Finance	Microeconomics	Mathematics For Business and Economics I
Financial Accounting	Principles of Economics	Statistics II
International Finance	Principles of Management	Econometrics
Investments	Statistics I	

* Refer to the E-Track website for the most current and complete list of courses.

Graduate School of Economics (Master of Arts Degree)

Teaching business economics in our interdependent and globalized world benefits from a mix of academic and practical knowledge, which I acquired from more than a decade of experience applying economics in business settings in a number of countries. Learning in a traditional lecture-based environment can be challenging for many students, so I adopt a few approaches to try to actively engage students in lectures. I incorporate practical exercises (usually Excel-based), that require students to apply theories learned in quantitative analyses. I believe encouraging student discussion in classes is vital; monologuing lectures rarely facilitates engaged learning and the development of critical analytical skills. Bringing passion and energy to the topics being taught, and linking theories to practical issues confronted in daily life, helps motivate students and makes it easier for them to relate to course content. I count myself lucky to teach at TIU, where the diverse backgrounds of students means they bring different interests and perspectives to business and economic issues. This often leads to new insights in class discussions.

Christopher Edmonds

Associate Professor of Development and International Economics
B.S. Cornell University | M.A. University of Chicago | M.S. & Ph.D. University of California-Berkeley

Digital Business & Innovation

Overview of the Major

Technology is leading the future and changing businesses everywhere. The Digital Business & Innovation (DBI) major was created to help today's students adapt to the current workforce by building a bridge between business and technology. What this means is that students will obtain knowledge on how to innovate products, services, and business models by using new technology. Students will learn how to identify and conceptualize key technologies and platforms as well as how to adapt these to foster business innovation.

DBI is separated into six concentration modules focusing on different areas of digital business. Be it fintech, AI, programming, entrepreneurship, or business management, this major offers focus areas for anyone interested in a future-forward education. With the newly built Digital Discovery Lab on campus, DBI students will be able to develop and practice their skills in a cutting-edge learning environment with state-of-the-art equipment. Graduates will be able to land positions in several fields at globally prestigious companies that are leading the future, or move on and obtain an MBA in the same area of study.

Teaching and research are two faces of my academic life which closely support each other. For my research, I love to be inspired by the courses I am teaching, and I love to teach something related to what I am researching. My research field is nano-quantum technologies, and teaching computer networks, for example, makes a great fit as I have been conducting research for developing future quantum networks. On the other hand, teaching blockchain technologies and artificial intelligence has made me concentrate my research on quantum blockchains and quantum artificial intelligence. As a result, my students learn the history, current state, and future of the topics we cover, which I believe will prepare them for their future careers. Moreover, my extensive experience in information technologies covers everything from international business to defense electronics, which brings our lectures closer to innovative business applications in real life.

Fatih Ozaydin

Associate Professor of Computer Science
B.S. & M.S. Isik University | Ph.D. Osaka University

Message from TIU Vice President

The concept of entrepreneurship struck me during my first job at Bell Laboratories in the US, which I started shortly after graduating with my PhD. Bell Labs, owned by US telecom company AT&T, was a premier research institution that was home to many prolific researchers, including several Nobel Prize winners. Although many of my friends left the lab to start their own businesses, I chose to become an academic. However, I also took some time off from my teaching to learn fashion design in Italy, and started my own online jewelry business. My business grew gradually with the rise of the internet, but in the end I decided to sell it to focus on my academic calling. I found that IT is a realm that offers boundless potential to tap into. With this concept at the heart of DBI, I guide my students to uncover their true potential, and it is a joy to see young people get motivated to create start-ups like I did! I found that the location of TIU and the resources we offer form an ideal breeding ground to be entrepreneurial.

Jay Rajasekera TIU Vice President and Professor of Digital Business and Strategy
Ph.D. North Carolina State University

Digital Business & Innovation Faculty

Jau-er Chen Associate Professor of Economics B.A. / M.A. National Chung Cheng University, Taiwan Ph.D. New York University	Rajarshi Mitra Associate Professor of Economics B.A. / M.A. Visva-Bharati University Ph.D. University of Wisconsin-Milwaukee

Shreya from India

We are currently living in a world dominated by the internet. It’s not a hidden truth that e-businesses, social media, e-learning, and hundreds of other services not only have an intensive technical, but also economic network. DBI smoothly integrates these two promising fields; business and technology. My DBI courses at TIU gave me a comprehensive understanding of upcoming technologies like artificial intelligence and machine learning. Moreover, the flexibility of TIU’s curriculum allows me to coordinate my study plan by integrating technical as well as business courses. These not only help me to learn about engineering principles, but also understand their front end applications in the contemporary business world. I was able to apply the knowledge I gained in the hands-on projects that I worked on with my group during the career-practicum program organized by Tech Mahindra in partnership with TIU. For the same reasons, I was also able to secure an internship at an artificial intelligence startup based in Silicon Valley as a content writer. In my opinion, DBI is the future. In the later course of my study, I aim to deepen my understanding of artificial intelligence while simultaneously working on business projects in this field.

DBI Concentration Modules

The DBI major is divided into six concentration modules for students to find exactly what piques their interest in the realm of technology and business. Become an expert in the latest digital trends and develop the skills needed for true innovation in the business world.

Entrepreneurship & Business Innovation		
Principles of Management	Digital Business Strategies	Innovation & Product Process Design
Entrepreneurial Strategies	Creative Thinking for AI & IoT Innovations	Entrepreneurial Strategy Practicum
Intro to Computer Networking	Mobile Tech, IoT & Business Apps	Introduction to Informatics & Computing
Intro to AI & Intelligent Product Development	Start-up Funding & VC Strategies	

AI & Deep Learning		
Database & Big Data	Mining Unstructured Data	Object Oriented Programming & Business Java
AI and Machine Learning for Decision Making	Econometrics	Foundations of Python
Text Mining and Deep Learning	Research Methods & Data Analysis in Business	
Creative Thinking for AI & IoT Innovations	Data Analytics & Information MGMT	

Digital Transformation & Tech Innovation		
Introduction to Informatics & Computing	Web and Mobile Technology	Mobile Tech, IoT, & Business Apps
Introduction to Computer Networking	Databases & Big Data	Principles of Management
Digital Business Strategies	Blockchain & Business Apps	Mathematics for Business and Economics II

Digital Marketing & Analytics		
Intro to R Programming & Business Analytics	Digital Business Strategies	Marketing Research
Web & Mobile Technology	Consumer Behavior	Market Modeling
Database & Big Data	Big Data & Analytics	Principles of Marketing
Digital Marketing	Python for Big Data & Visualization	Global Marketing

Digital Finance & Fintech		
Macroeconomics	Machine Learning in Finance and Economics	Bitcoin, Cryptocurrency Tech & E-Money
Microeconomics	Corporate Finance	Money & Banking
Principles of Economics	Financial Accounting	
Digital Banking and Fintech	E-business and Payment Systems	

Digital Business Management		
Business Communications & Productivity	Digital Business Strategies	Corporate Finance
Intro to Informatics & Computing	Financial Accounting	Social Media and Business
IT Project Management	Human Resource Management	Principles of Management
Digital Marketing	Operations & Service management	

* Refer to the E-Track website for the most current and complete list of courses.

Graduate School of Digital Marketing & Business (Master of Science Degree)

In the modern age, the demand for professionals in digital marketing far exceeds supply, leaving businesses frantically searching for globally oriented individuals with both business and IT skills. I have always been on a quest for knowledge and am interested in learning novel things. My passion for digital marketing started during my undergraduate studies when my focus was on building e-commerce websites and coding. However, at that time there were no specialized majors in IT business, so I combined multiple degrees in related fields as well as pursued research on virtual and augmented reality to fill the gap. Later, I chose to study marketing analytics in Japan, the best destination for this purpose. TIU offers a globally competitive specialization in IT business that encompasses digital marketing and analytics in one degree, making it the only program of its kind in Japan. The program covers topics ranging from social media and search engine optimization, online advertising, big data and analytics, to virtual and augmented reality, as well as courses covering breakthroughs in blockchain technologies and the internet-of-things. Students will also benefit from practical courses in state-of-the-art computer labs. This is your perfect opportunity to learn the skills that will lead you to further success!

Nora Sharkasi

Associate Professor of Digital Marketing, Data Analytics, and Entrepreneurship
B.S. LaRoche College, Pittsburgh, USA | M.S. London School of Economics and Political Science (LSE), UK
M.B.A. Birziet University, Middle East | Ph.D. University of Tsukuba, Japan

Partnership with Leading Global IT Giant

Digital transformation, or DX, is exactly what has happened at TIU! We created a unique path for our students to tap into the opportunities created by the rapidly advancing digital century. Following the establishment of the DBI program, TIU attracted the attention of two global technology companies. One, Tech Mahindra, is one of India's leading IT companies with more than 125,000 employees across 90 countries; the other, Gyrfalcon Technology Inc. (GTI) is a world-leading developer of high-performance Artificial Intelligence (AI) processors based in Silicon Valley. TIU students in the DBI program are privileged to cooperate with leading companies that connect them to the forefront of DX, supported by experienced faculty and their research, while gaining the practical skills necessary for the digital century.

Message from Chief Innovation Officer at Tech Mahindra

Makers Lab collaborated by giving TIU students the opportunity to learn global business collaboration through a full practical course delivered by world-class IT experts from our research campus in Pune, India jointly with faculty from TIU's Digital Business and Innovation (DBI) program. The program allowed TIU's J-Track students to study with E-Track students to explore how to use AI, IoT, and Block Chain in business. I am very pleased to hear that the Career Experience Practicum course with Makers Lab received high evaluation by TIU students. We will continue to cooperate with TIU faculty in exploring cutting-edge AR/VR technologies for Digital Marketing as well.

Mr. Nikhil Malhotra

Chief Innovation Officer | WEF AI Fellow | Tech Mahindra

Career Experience Practicum: TIU-TECHM Project

Students can even experience how cutting-edge business applications are developed by IT experts by taking a course co-developed by the DBI faculty with IT experts from the Makers Lab, Tech Mahindra's IT Innovation Lab located in India. This career practicum provides invaluable hands-on experience for students.

Partnership with the European Organization for Nuclear Research (CERN)

TIU established a Memorandum of Understanding with CERN in Switzerland, becoming its third official cooperating organization in Japan. Professor Fatih Ozyaydin will lend his expertise in the feasibility study for the development of a 100km Large Hadron Collider (LHC). The design research for this project has involved over 1,300 professionals from over 150 universities, research institutes, and corporations from around the world. TIU will continue to promote joint research with universities and institutes around the world, and will act as a base for global research.

Fatih Ozyaydin Associate Professor of DBI

International Relations

Overview of the Major

International Relations is a field of study dealing with how nations with varying power, interests, and identity interact with each other in the absence of a global government. The discipline originated in the tragic experience of World War I, when unprecedented devastation called for a systematic inquiry into the causes of war and conditions for peace. Since then, the range of issues covered in the discipline has expanded to include economic interdependence, international organizations, terrorism, poverty, human rights, and climate change, among others.

International Relations as a discipline is not just about what is happening around the world. We study why countries and national leaders behave the way they do, using different intellectual lenses called theories. When discussing global issues such as nuclear proliferation, terrorism, refugees, hunger, and global warming, there is no such thing as a "correct answer" that satisfies everyone. The important thing is that you respect different viewpoints and work to find common ground. Classroom discussions provide valuable opportunities for students with diverse cultural backgrounds to present their views and learn from each other. The skills learned are extremely useful not only in the way students approach their daily lives, but also in their future workplace, be it a multinational firm, government, or international organization. The International Relations major is for students who want to contribute to international societies as global citizens.

My interest in international relations led me to study abroad in Croatia at a time when the country was confronted with the task of dealing with the immediate legacy of armed conflict. It was in part this experience that led me to ask questions about how societies deal with the legacies of conflict, and to eventually write a doctoral dissertation on efforts to prosecute war crimes in the former Yugoslavia. Today, I continue to research and write on topics related to post-conflict justice and state-building, and I contribute to both scholarly journals and more widely read journals such as Foreign Affairs and Foreign Policy. In the classroom, my students are encouraged to discuss contentious issues that are at the forefront of international politics so as to better understand academic and policy debates, and also to think about how they can apply their own ideas and experiences to addressing real world problems.

Christopher Lamont

Assistant Dean of E-Track and Associate Professor of International Relations
B.A., University of Mississippi | M.Sc., University of Edinburgh | Ph.D. University of Glasgow

Message from the Dean of E-Track Program

I became interested in the issue of war and peace when I was seventeen and lived in the United States for a year as a high school exchange student. The experience left me with a lot of fun and precious memories but also with a long-lasting puzzle: why did Japan fight a war with the United States during World War II? My personal relationship with my host family, classmates, teachers, and other members of the community was such that it was almost unimaginable for me that the two countries fought a bloody war in the not-so-distant past. How can close friends so suddenly become major enemies? These questions led me to choose international relations as my major when I came back to Japan and went to college.

Akitoshi Miyashita Dean of E-Track and Professor of International Relations
B.A. Tokyo International University | M.A. American University | Ph.D. Columbia University

International Relations Faculty

Edwin from Indonesia

I have been fascinated by social sciences and all of its dynamics since I was in high school. I believe the key role that is played by social sciences is to explain and predict what could happen in this ever-changing world of ours. I wanted to know more about the dynamics of the world, and possibly make it a better place for everyone. I knew the moment I saw the core studies in this discipline that this was the right place for me. The skills I have acquired through my studies at TIU will be helpful in problem solving and analysis.

IR Concentration Modules

Courses within the IR major have been organized into four “subfields”. Find the subfield that matches your interests for recommended courses to take to meet your individual goals.

Global Governance		
International Law	Understanding Globalization	International Integration
International Politics	Introduction to Sociology	International Relations of Europe
International Organization	Global Sociology	Qualitative Research Methods
Human Rights	Political Economy Development	Critical Approaches to Development Politics
International Environmental Policy	Political Theory	International Relations of China
Transitional Justice	International Development	International Relations in the Age of AI

International Security		
International Security	International Political Economy	International Relations of the Middle East
Maritime Safety and Security	International Politics	Japanese Politics in Comparative Perspective
Non-state Actors and Political Violence	Maritime Security and Ocean Governance	Qualitative Research Methods
War and Peace in East Asia	Chinese Politics in Comparative Perspective	U.S Politics and Foreign Policy
Introduction to Social Psychology	International Relations of South Asian	International Relations of China
Comparative Politics	International Relations of Southeast Asia	U.S.Policy toward Asia

International Political Economy		
International Political Economy	Comparative Politics	Critical Approaches to Development Politics
International Development	Understanding Globalization	Political Development of East Asia
International Integration	International Environmental Policy	Resource Politics
Political Economy of Development	International Relations of Asia-Pacific	International Relations of China
Sustainable Society	International Relations of South Asia	

Culture and Society		
Comparative Culture	Tourism: Analysis and Planning	Human Rights
Global Sociology	Pre-modern Japanese Literature	Political Economy of Development
Gender in International Relations	Contemporary Japanese Literature	Political Theory
Japanese Popular Culture	Gender in International Relations	Understanding Globalization
Japanese Society	Introduction to Social Psychology	International Relations of South Asia
Issues in Popular Culture	Introduction to Sociology	Critical Approaches to Development Politics
Media and Society in Japan	Sustainable Society	International Relations of Japan

* Refer to the E-Track website for the most current and complete list of courses.

Graduate School of International Relations (Master of Arts Degree)

Poverty and underdevelopment in my country led me to pursue further education in Japan. Upon arriving in Japan, I had the opportunity to study at TIU’s Graduate School of Economics, where I obtained my MA and PhD in Economics. The knowledge that I acquired helped me to understand why some countries are underdeveloped and others are developed. It is exciting and fascinating to be teaching in TIU because you always can engage students from diverse backgrounds who provide real-life experiences illustrating the theories and issues that we learn in class. IR at TIU offers students the opportunity to study a wide range of problems and issues that have a global impact. In my teaching, I want my students to master the dynamics of globalization and become knowledgeable in economic theories that will help them to be creative and skillful in domestic and international negotiations. I also motivate my students to acquire practical skills in data handling and empirical analysis, which can sometimes be challenging for some IR students but important for their future careers.

Samuel Amponsah
Associate Professor of Economics
M.A. & Ph.D. Tokyo International University

Global Dialogue

The TIU Global Dialogue is an international speaker series organized by Tokyo International University's (TIU) E-Track International Relations (IR) program. Established in 2019, our Global Dialogue brings top experts, academics and policy practitioners from the many fields of international affairs—politics, diplomacy, military, economics, and industry—to TIU to share research findings, and discuss issues of strategic importance to Japan and the world.

Guest Speakers and Seminars

Our TIU Global Dialogue sessions offer our IR students a unique opportunity to hear directly from those who are involved in shaping foreign policy, and also scholars who are invited to present their cutting-edge research to our student and faculty community. Recently, we were delighted to welcome Mr. Daniel Russel, who served in a number of senior U.S. diplomatic positions, including Assistant Secretary of State, Special Assistant to President Barack Obama and National Security Council Director for Asian Affairs. Mr. Russel was able to lift the veil on the U.S. foreign policymaking process in his talk, and he also answered student questions about President Biden's foreign policy in Asia. As an IR student at TIU, you will be able to regularly join these monthly events and start networking with leading practitioners and scholars in IR.

You can follow our events on our YouTube channel:

Model United Nations Varsity Team

The Model United Nations at TIU is a varsity team with over 60 members from 15 countries around the world, and has become the first university team founded by international students. The MUN is a simulation of conversations and debates held in the same fashion as the actual United Nations, and the diverse student body at TIU makes it the ideal environment to get first-hand experience with the unique cultures and values of people around the world. With coaching from Thomas Blackwood, Professor of Sociology, the club members select a president to lead the team through weekly mock discussions and debates in preparation for conferences across the globe. Students new to the university and Japan find the MUN a great way to feel at home in a new culture, while developing academic knowledge in addition to soft skills like public speaking, debating, and writing.

I have a lot of positive feelings about the TIU MUN. The varsity team originated in 2017, and since then the team has already attended numerous conferences and made a great impression on the other schools in attendance. At the All Japan MUN in December 2017, our varsity team members took home half of the total awards, and I was humbled to be named the Best Delegate of the UNHRC Committee. In addition, in July 2018 TIU hosted its first international MUN conference, with delegates who traveled from countries around the world in attendance. However, I truly do believe that we can go even further than this. We are aiming to attend more conferences outside of Japan, especially the most prestigious ones in the US and the UK. I am looking forward to continuing my involvement in the MUN even after graduation, and know there are great things in store for the TIU team.

Wichuta Teeratanabodee International Relations Alumna (2018) and Former President of the TIU MUN

General Education

TIU's general education courses aim to broaden your general knowledge while developing a strong academic foundation. By pursuing a wide range of interdisciplinary courses, you will deepen your understanding of fundamental social issues and grow into a truly international-minded person.

Liberal Arts

The liberal arts courses are a way for students to take fundamental courses relevant to their major during their first year. While some are required depending on a student's major, a wide range is offered for students to develop a broad comprehension on a variety of subjects.

- Fundamentals of Mathematics
 - Principles of Management
 - Introduction to Social Psychology
 - Introduction to Sociology
 - Statistics I
- IT Literacy
 - Sustainable Society
 - Introduction to International Relations
 - Principles of Economics
 - Principles of Political Science
- World Economy
 - Introduction to Informatics and Computing
 - Business and Social Impact
 - Food Value Chain and Sustainability
 - Introduction to the Islamic World

* Refer to the E-Track website for the most current and complete list of courses.

Japanese Language

Students in their first semester at TIU learn Japanese in a small class setting four days a week. Instructors help students with no prior Japanese experience develop fluent Japanese skills by the time they graduate and work to push students who have already studied Japanese to even higher levels of proficiency.

The Japanese Language Institute supports international students in every aspect regarding Japanese language acquisition. There are two major missions of Japanese language education at the JLI: to build communicative ability for students' daily lives and to prepare them with the business level proficiency required for entering the Japanese workforce. With these goals in mind, the JLI has established a series of tiers to TIU's Japanese language education to ensure that each student is enrolled in the level that is most suited to their individual needs. Currently, there are 20 instructors within the JLI that allow TIU to maintain a small classroom size, as well as catered one-on-one advisory after class when students have free time. It brings us great joy to work together with international students to keep them motivated to study Japanese and eventually make it a common language for life.

Kenji Yokota B.A. Sophia University | M.A. University of Tokyo | Ph.D. Osaka Prefecture University

- Elementary Japanese 1A
- Elementary Japanese 1B
- Elementary Japanese 2A
- Elementary Japanese 2B
- Intermediate Japanese 1

* 1st Year Sample Semester

Four-Year Academic Flow

Freshman (1st)	Sophomore (2nd)	Junior (3rd)	Senior (4th)
Academic Literacy			
Liberal Arts			
	Major Courses: BE / IR / DBI		
	Japanese Language (Beginning / Intermediate / Advanced / Business)		
	Special Programs (Electives): Volunteering, Internships, Study Abroad, etc.		

The first year will focus on academic writing, analytical thinking as well as Japanese language courses for students to not only adapt to life in Japan, but to prepare them for more intense high-level courses offered from their second year and onward. In combination with liberal arts courses, students will be able to apply the skills they have gained the first year towards their major studies.

Andreas from Sweden

I have always held an interest in international relations and Japan's very unique culture. Upon discovering TIU and its international relations major, I felt it was the perfect fit for me. One of the major challenges I saw in front of me was the Japanese language, since I had no prior knowledge. However, TIU made this challenge significantly more surmountable. TIU offers its international students a great amount of exposure to the Japanese language, such as at the Japanese Plaza and clubs where you can engage with the Japanese students. The Japanese classes are intensive and the professors ensure every student is able to follow the lessons, which leads to fast and steady learning. After just a couple of months, I can now understand and engage in basic conversation, and I look forward to learning more here at TIU.

Study Options

Pursuing your undergraduate studies at TIU has countless benefits, including many that no other university in Japan can provide. From early graduation to study abroad options around the world, utilize these special opportunities to make the most of your university education.

(Picture: Sister School, Willamette University - Mark O. Hatfield Library)

Advantages

1 Take more classes, pay the same tuition

Unlike many universities in other countries, tuition at TIU is a flat rate and is not charged per credit. This means you can take up to 20 credits (or 24 if you are a senior) for no extra cost.

2 Take major courses in Japanese

During your time studying at TIU, if you reach a certain level of Japanese language proficiency, you have the option of taking courses to satisfy your major requirements that are taught in the Japanese language.

3 Change majors after enrollment

Choosing a major is not a lifetime commitment at TIU. If you decide that your major is not right for you after enrolling, you are able to change majors during your study.

4 Take courses outside of your major

If there are classes that you find intriguing outside of your major, these can be taken as electives. If you change majors, these credits can count towards your new major.

Early Graduation

For high-achieving students, TIU provides an opportunity to complete your BA/BS in as little as 3 years, and earn your MA/MS degree in just 5 years.

Study Abroad Stories

Hanh from Vietnam

Hello, my name is Hanh and while studying Business Economics at TIU, I decided to devote my junior year to studying abroad at the University of Chester in England through the ISEP program. The desire to travel and see the world runs in my family. My parents also studied abroad, and they inspired me to follow in their footsteps. Everything is a completely new experience and my school has huge campuses scattered around the city. We have fewer class hours but a greater emphasis on independent learning. The food is nice and the portions are enormous, but I still crave Vietnamese and Japanese food. I love my exchange program here!

Opportunities at Willamette U.

TIU's sister school relationship with Willamette University provides students with a number of opportunities to enhance the scope of their university takeaways.

1 Double Degree Program

High achievers have the opportunity to spend 2.5 years at TIU in Japan, then move on to their final 2 years at WU in the United States to earn two bachelor's degrees at the same time in a total of 4.5 years!

2 Atkinson MBA

Willamette University's Atkinson Graduate School of Management is offering TIU graduates the same enrollment and scholarship benefits as their own alumni. This is a great opportunity to plunge into business management after your time at TIU.

Study Abroad Programs

TIU is one of the only universities in Japan affiliated with ISEP (the International Student Exchange Program), a global organization promoting international exchange for one or two semesters. This program opens up opportunities to study at over 300 of its affiliated universities in over 50+ countries around the world. More and more TIU students are taking advantage of this affordable opportunity, with popular study destinations being North America, Europe, and Australia. In addition, TIU has special exchange agreements with 28 universities in 21 countries, including double degree opportunities at both Willamette University and Southern Oregon University, USA.

Study Abroad Stories

Mavy from Russia

I love traveling around the world and experiencing new things, so last summer I decided to apply for ISEP and do an exchange program at La Trobe University in Melbourne, Australia. I've only been here two months yet I am already in love with this place. I experienced so many new things here that I'm excited to bring back to TIU when I finish the semester abroad. In the two months since I have moved here, I am meeting new people, making friends, getting used to a new culture, challenging myself, learning new methods of teaching, and so much more!

Career Support

International students have unlimited access to the Career Center, where they can receive one-on-one advising with career specialists. This great resource prepares students for the job hunt with a focus on career development through a variety of events and guidance sessions created to help start students' careers after graduation.

The Career Center also provides guidance for internships, interview tips and practice, insight into career paths, as well as seminars on important topics to help students succeed in the next chapter in their life. In addition, the Career Center also invites outside companies for exclusive on-campus information sessions. These sessions provide students with the opportunity to speak with real employees and learn about the status quo of the workforce.

- 1-On-1 Counseling
- On Campus Job Fairs
- Internship Programs
- Information Seminars
- Resume Writing Support

In order for TIU students to gain an accurate insight into the job hunting process, presentations and discussion sessions by guest speakers, including students who have received job offers, are held throughout the year. With experience and a high track record at the forefront, the Career Services Office supports programs that provide tools for TIU E-Track students to secure spots in the current global workforce. These programs have paved the way for international students to achieve a high employment rate.

Sylvie from the Netherlands

As a BE student aspiring for a career in digital marketing, I realized that in addition to marketing, knowledge and practical experience about coding and IT would be essential for success in this field. Thus, this past spring break I interned at an IT company in Osaka for 6 weeks. I started by learning the basics, and was later given assignments to tackle and showcase my takeaways from the experience. The company had other interns as well from many different countries, so whenever I had a question I could ask them or the staff working around me for help! After this experience, I signed up for Professor Sharkasi's digital marketing course and I am really excited to put the concepts and practical skills I am refining to use!

Academic Advisory

Students at TIU come with their own unique career goals from countries and economies far and wide. Some aim to work in Japan, while others plan to pursue global careers or advance to graduate programs around the world. Academic advisors at TIU offer support to students of diverse backgrounds through individual career counseling sessions, development programs, and specialized courses where students can receive credits towards graduation. With expertise spanning across countless cultures and countries, these advisors help students come up with career plans, as well as extinguish any concerns, doubts, or uncertainties. Academic advisory is a team effort to provide catered support, advice, and encouragement day by day with the mission of assisting students in achieving their individual goals after graduation.

Kuniko Ishiguro
Associate Professor of Management
B.A., Gakushuin University | M.Sc. & Ph.D., University of Sheffield

Beyond TIU

TIU University of London, United Kingdom

After graduating from TIU, I worked as a tech consultant at a multinational consulting firm, and then as a data scientist at a leading data-driven start-up in Thailand. Currently, I am a postgraduate student conducting research to help companies develop data-driven strategies to capture their greatest opportunities in the digital era.

My journey at TIU had a remarkable impact on my personal development. It provided me with great opportunities to cultivate multidisciplinary skills to gain a competitive edge in the job market and postgraduate admission. The professors at TIU were also immensely helpful. It was a blessing to learn from professors from around the world, and they were always happy to provide me with guidance both during and after my life at TIU.

Voravich Chaturavichanan (Thailand)
Business Economics, Graduated in 2019

TIU Central European University, Austria

The first two people I messaged about my admission to the Ph.D. program in Political Science at CEU were Professor Chen and Professor Blackwood. In many ways, I owe my achievements to their unwavering support. I knew I wanted to stay in academia, which requires a lot of long-term planning. However, I had only a vague idea of the requirements. This situation propelled me to turn to my professors for advice, but they did more than that: they mentored me through the entire process, provided me with a research assistantship opportunity, and wrote me letters of recommendation. Because of this, I am now doing my Ph.D. at one of the leading institutions in Europe. I still remember how my time at TIU has been a stepping stone for my career path.

Ton Nu Thuy Duong (Vietnam)
International Relations, Graduated in 2019

Tran Linh Chi from Vietnam

Knowing the hiring process for new graduates in Japan, I began utilizing the TIU Career Center as early as I could. I knew I would have an advantage by starting early, so with the help of TIU, I interned at several companies during my second year. I knew the internships were going to be challenging, as I had to speak Japanese. Thankfully TIU offers Japanese courses all the way through business and advanced levels, which helped me not only in my internships but also when interviewing for jobs. I chose to look for jobs in Japan due to the fact that Japanese companies are very open to new graduates. Companies will focus on your potential and invest time and effort into training you into a skilled professional. By believing in yourself and persevering, employees will see your potential and support you in your journey, so just keep working hard! your journey, so just keep on working hard!

Campus Activities

From cultural events to sports and culture clubs, there are endless ways to get involved with the community in and around TIU.

Varsity Teams			
American Football	Ekiden (Japanese Marathon Relay-Race)	Model UN	Tennis
Archery	Golf	Men's Soccer	Weightlifting
Baseball	Japanese Cultural Club (Japanese Tea Ceremony)	Women's Soccer	Wind Orchestra
Cheerleading	Kendo	Women's Softball	

Sports Clubs

Art	Drama Group Epsilon	Mellow Dolphin Jazz Orchestra	Tiny Love (Music Band)
Beat Music Association (B.M.A.)	E.S.S (English Speaking Club)	Photography	Travel
Computer Study Group	Guitar	Street Dance U.G.G	Volunteer Group

Varsity TEDxTIU Team

TEDxTIU is a student organization with the goal of providing a platform to the TIU community for the exchange of ideas through self-organized workshops and licensed TEDx events. This varsity club facilitates the development of new and existing skills vital in post-undergraduate life such as leadership, communication, and event-organization. Beyond this, members are able to meet other talented students and form great bonds, breaking cultural and language barriers.

Varsity Club AT TIU

Varsity Soccer Team

Upon entering the highest bracket of Japan's university soccer league (Division 1) in 2018, TIU's varsity team has seen great success across the board. The sprawling Sakado Campus is home to the majority of TIU's varsity teams. It boasts world-class grounds that are meticulously maintained according to pro-level regulations and supports the highest level of intermural competition. All varsity teams welcome international students with open arms, and provide an invaluable way to assimilate into a new country. The sports facilities on this campus are not widely available at universities in Japan, and provide a great opportunity to make friends in new surroundings as well as maintain a healthy study balance in your daily life.

Varsity Archery Team

The archery grounds at TIU are nestled in a quiet, outdoor field of completely natural grass that is perfect for training and official competitions. While archery as a sport requires great discipline and persistence as an individual, international students have found their place in this club thanks to the welcoming team dynamic. Tarkan Koc, a transfer student from Germany, was introduced to this club by a classmate and "hooked" due to the sense of accomplishment after improving his shooting distance. Students who do not have their own bow may borrow one from the university, so anyone can join. Tarkan's favorite takeaway is "seeing other students constantly improving".

Campus Facilities

TIU has three campuses in Japan that are fully equipped with state-of-the-art facilities to support students both mentally and physically.

Campus 1 Home to E-Track students with facilities that support a rich campus life, including classrooms, professors' offices, a library, laboratories, student support offices, plazas, an auditorium, two cafeterias (including one that offers halal and vegetarian food), and a convenience store.

Sakado Campus The Sakado campus contains all of our major sports clubs. With state-of-the-art facilities and assistance from professional coaches, students are able to flourish as part of a larger unit, which can be a great asset in academia as well.

English Plaza A multipurpose language center, the English Plaza has a casual atmosphere for studying and socializing. Students can use the adjacent café lounge, making for an ideal study environment.

Japanese Plaza The Japanese Plaza has a relaxed environment that is perfect for international students to meet Japanese classmates and teachers for a chance to utilize the skills learned in the classroom.

Support Offices Several offices are located on campus specifically to help international students throughout their studies at TIU. Whether it be support with visa applications, housing, scholarships, part time jobs, internships, job fairs or how to build a strong resume, students can always find a helping hand.

Library

The library at TIU is equipped with thousands of books and academic journals in English for students to utilize. Through the computers available, students are also able to access endless material via online services. Study spaces are located throughout the library for students who want to read in a quiet environment.

Cafeteria

In addition to several food trucks and an on-campus convenience store, our main campus has two cafeterias with various menu options that change weekly. As of spring 2019, one of our cafeterias was renovated, and an all-Halal and vegetarian menu was introduced.

Laboratory

Opened in the spring of 2019, the new Digital Discovery Lab (DDL) functions as one of several labs that enables DBI students to maximize their potential.

Our dorm rooms are fully equipped with beds, closets, refrigerators, stoves, sinks, showers, and toilets.

Dorms

TIU provides both single and shared dormitories to allow students to choose the option most suitable for their individual lifestyles. Our newest addition to our dormitories is the all-girls dormitory, R5. All E-Track students at TIU are welcome to live at our dormitories for up to one year.

Gymnasium

While Sakado Campus is the center for sports at TIU, campuses 1 & 2 are also equipped with gymnasiums and fitness gyms for our students to use, whether for clubs or personal use.

Sabrina from Indonesia

When I first moved to Japan, it was my first time living on my own. Thus, one of the most important elements that helped me settle in to my new environment was making friends. I live together at the R5 dormitory with people of many different nationalities, which has helped me diversify as a person. However, one of the biggest challenges I had when I first landed here was the language barrier. Even though majors are taught in English, I have been taking Japanese language classes at TIU to help me overcome this. This has improved my confidence in speaking dramatically. For me, the key to surviving school is to be friendly with everyone and eager to learn, because people will happily be friends with you.

Alumni Association

The TIU E-Track Alumni Association (or, TIU EAA) is the official alumni association of the Tokyo International University. It was founded in March 2019 on the initiative of TIU and TIU alumni who saw it as their goal and passion to connect TIU students after graduation. TIU has nurtured internationally-minded students and this Association will keep them in touch across countries for a lifetime.

The TIU EAA is here to support and guide TIU alumni on their career path, offer them the benefit of staying connected with alumni peers and benefit from the vast, international TIU network.

Who We Are

Studying at TIU was one of my most life-changing experiences. I really enjoyed the IR major, which allowed me to specialize in Japanese and Asian Pacific politics. During my time at the University of Sheffield, I continued to stay heavily involved in university affairs by taking the responsibility of several representative positions within the university.

Bastian Harth Chairperson of TIU's EAA

Affordability

University Fees and Scholarships (Undergraduate)

All students who apply for TIU’s English Track programs are also eligible to apply for a tuition reduction scholarship. The scholarship, if awarded, reduces the tuition fee by 30% to 100% for up to four years for first year students and up to two or three years for transfer students. Scholarship and admission results will be announced simultaneously so students and families can plan accordingly.

* A 40,000 yen (\$333) alumni association fee will also be charged prior to enrollment.
* 2nd and 3rd year transfer students’s tuition fees are on the basis of the rate stated under Years 2-4 (2023) in the above graph.
* The numbers in parentheses indicate the approximate amount in USD at the estimated exchange rate of: \$1 = 120 yen.

Other Scholarships

■ TIU Model United Nations Scholarship

The TIU MUN Scholarship is for first year students who have previous experience in MUN, choose International Relations as their major, and commit to joining our award-winning MUN team at TIU. Recipients of the TIU MUN Scholarship will see their enrollment fee of 250,000 JPY waived. For screening criteria, please refer to our website.

■ Japan Student Services Organization (JASSO) Scholarship

In order to support international students and help them assimilate to their new home, the Japanese government provides students with an opportunity to apply for a special JASSO scholarship that grants a living stipend of 48,000 yen per month for 6 months (September enrollment) or 12 months (April enrollment). Due to TIU’s great initiative to bolster the international population, virtually all students who apply for this scholarship are successful.

Cost of Living

Dormitories

In order to foster a safe and comfortable learning environment, TIU operates dormitories in and around campus for students coming to Japan for the first time. We have 250+ dorm rooms available for international students, offering both single and shared rooms. Dormitory managers and Residential Assistants are available on-site to help international students as they adapt to their new life in Japan.

	Monthly Fee	Move in Fee
Single Room	JPY 39,000 (US\$325) (utilities fees not included) ~ JPY 55,000 (US\$458) (utilities fees included)	JPY 30,000 (US\$250)
Shared Room (2 or 3 residents)	JPY 27,000 (US\$225) (utilities fees included) ~ JPY 49,000 (US\$408) (utilities fees included)	JPY 25,000 (US\$208)

* The numbers in parentheses indicate the approximate amount in USD at the estimated exchange rate of \$1 = 120 yen.
* Dormitory costs vary depending on factors such as location, building, layout, room type, etc. In general, newer dorms are at a higher price range.
Note: Dormitory costs are subject to change without prior notice.

For more details about dormitories and life at TIU, scan this QR code or access:
<https://www.tiu.ac.jp/etrack/life/facilities.html>

Renting Apartments in Japan

It is easy to find affordable apartments in the areas surrounding TIU’s campuses. The actual monthly rent of apartments differs dramatically based on size and location, though it is realistic to expect to pay between 30,000 and 50,000 yen (\$250 ~ \$416) per month. Students have the option to live alone in a studio apartment, or live together with a friend or classmate in a shared apartment. While most apartments are not furnished, some real estate agencies do have furnished options available at a higher monthly price. Unfurnished apartments may have an air conditioner pre-installed, but other furniture and appliances for daily life like beds, couches, refrigerators, microwaves, and the like must be purchased by tenants on their own. TIU will not find apartments for its students, but the university does have a contracted English speaking agency available to assist students in their search.

Monthly Living Costs

As you can imagine, daily habits and overall way of life play a large role in determining how much money is spent per month. However, most students say that they spend on average between 70,000 and 95,000 yen (\$583 ~ \$791) per month on all expenses (including apartment rent, utilities, food, and other bills). As you move closer to the heart of Tokyo, the cost of living will increase, but there are plenty of affordable and convenient options for TIU students near the campus.

Total Cost of Living at TIU

When taking the factors mentioned above into consideration, we can estimate that the average cost of living and TIU tuition and fees with no scholarship would be roughly 2,290,000 yen (\$19,083) for the first year. Although Tokyo is thought to be one of the most expensive cities in the world, this is a dramatic misconception. Students are often pleasantly surprised at how affordable Tokyo is compared to other global cities.

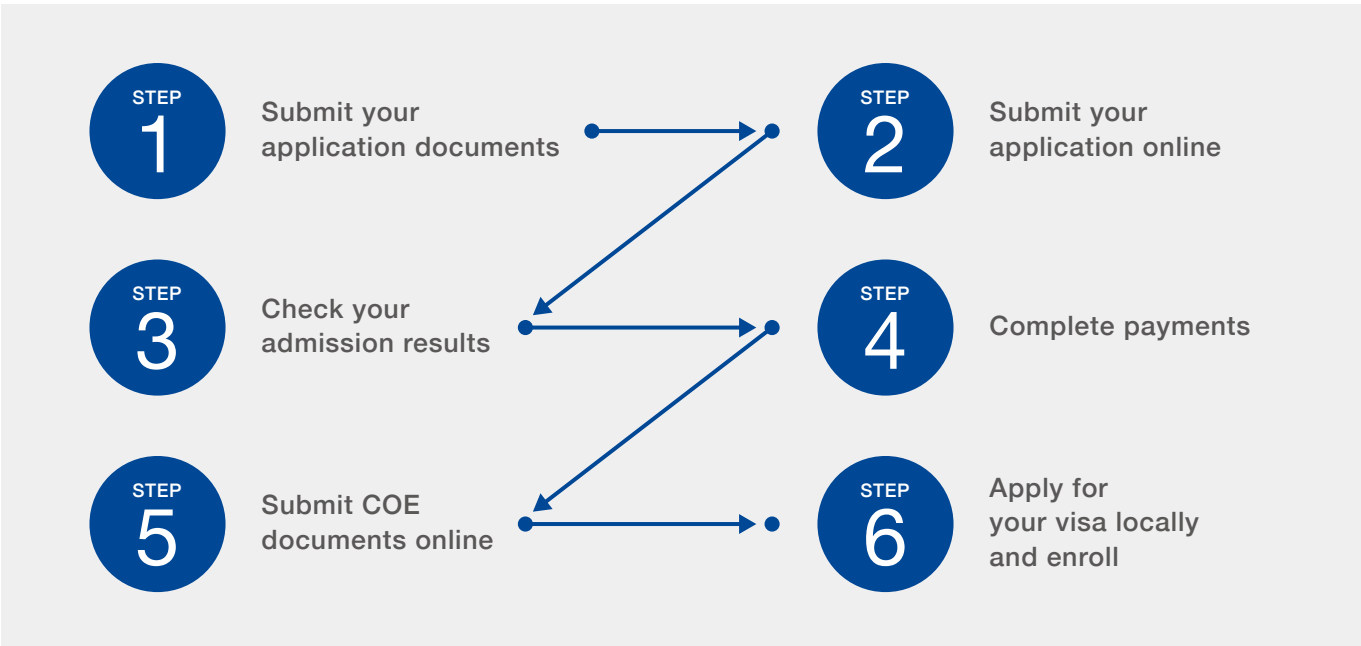

Vaamika from India

I consider my experience at TIU to be memorable and full of exposure. Educational excursions, TIU Halloween parties, Sports Day, and exploring Japan with friends are just a few of my best experiences. The cultural diversity is seen on campus not only through the international students but also with the international cuisines that are offered in the cafeterias. The dormitories are quite close to campus, and I love walking to campus while feeling the fresh air and the beauty of the nearby nature. The university also takes care of students through various workshops, and provides peer assistants to help first-year students who are not well versed in Japanese. Last, but not least, International Relations as a course in itself is wonderful, with the most supportive faculty, and I hope to achieve much success in my future endeavors by working hard on the path laid out for me by my professors and TIU.

How to Apply

Application Flow

Admission Schedule

Spring (April) Intake

	Application	Results
S1	Jun 22 - Jul 6, 2022	Aug 1, 2022
S2	Sep 7 - Sep 28, 2022	Oct 31, 2022
S3	Oct 26 - Nov 16, 2022	Dec 19, 2022

Fall (September) Intake

	Application	Results
F1	Oct 26 - Nov 16, 2022	Dec 19, 2022
F2	Jan 4 - Jan 25, 2023	Feb 27, 2023
F3	Feb 8 - Mar 1, 2023	Apr 10, 2023
F4	Mar 22 - Apr 12, 2023	May 22, 2023

* Refer to the Application Guidelines on the E-Track Homepage for more details.

Eligibility

- 1 First year applicants: High School Diploma (12-year curriculum)
- 2 Transfer applicants: Earned the amount of credits equivalent to 1 or 2 years of a 4-year degree program
- 3 English proficiency:

Tests	First Year Score	Transfer Score
TOEFL iBT	61	80
TOEIC (Listening & Reading)	700	780
IELTS	5.5	6.0
Pearson PTE Academic	45	50
EIKEN	Pre-1	Pre-1
Duolingo English Test	90	95

* All tests must have been taken within two years of the date of application.
* 3rd-year transfer applicants applying for DBI are required to have completed and earned credits in the following subjects at a university or junior college: Mathematics, Statistics, IT related course(s).
* Check the Application Guidelines on TIU's homepage for more details about eligibility.

Check the E-Track home page for more details about TIU and admissions.

2023 FALL NEW OPEN IKEBUKURO CAMPUS

In 2023, Tokyo International University will establish a new urban campus in Ikebukuro, right in the heart of Tokyo. The E-Track Program, as well as other educational globalization functions, will be centered on this new campus. The university is planning to relocate half of the student body (roughly 3,500 of 7,000 students), and amongst those 3,500 students, the aim is 2,000 international students from over 100 countries. The addition of the new Digital Business and Innovation major is a major initiative for TIU to reach this ambitious goal. This new campus will dramatically strengthen the foundation of the globalized education already present in TIU, as well as bolster the overall globalization of Ikebukuro.

Watch the CGI Concept video via the QR code above, or type in the keywords "TIU Ikebukuro" directly on YouTube.
